

Alyssa Sanders'

CPSP218G Digital Image Processing Software Proof of Concept Exercise.

My experience thus far as a student in the Earth Life and Times Program has been educational as well as entertaining. Above, I am outside of the carousel in Washington, D.C. As a student, we have been involved in many activities outside of campus, including a scavenger hunt of the museums of the Mall in the Nations' Capital. Along with exploring museum exhibits, this scholars' trip allowed us to explore the city. That just happened to include taking a turn on the carousel!
