Proof of Concept Exercise

I feel very privileged to be a part of the Earth, Life, and Time program at College Park. Not only have I been constantly learning new and interesting information about various aspects of science, but I have enjoyed it immensely. The professors for this class try their hardest to make the lectures fun and enjoyable, and they usually succeed. The field trips that we attend present opportunities to learn in an interactive fashion, setting the class even farther apart from the rest. I could not be happier with the Scholars Program in which I chose to participate, and I know that I will miss ELT after this year, but I hope to stay involved by becoming a TA for the class.
