Digital Image Processing Software Proof of Concept Exercise

My experience in ELT thus far has been nothing but fun and educational. I have learned so many different things concerning topics that I have never learned about before. I have met many new people and have had the opportunity of going on many field trips that have taught me many new and interesting things. Some of the field trips I had the opportunity to go on included The National Zoo and The Natural History Museum. One of my favorite things in ELT was being able to do my genealogy to see where my ancestors were located on the globe. All in all ELT has been a good experience and I have enjoyed it very much!
