Concept Exercise

The Earth, Life, and Time Scholars Program has been very beneficial. I have gained valuable experience and knowledge from lectures, field trips, assignments, and even basic discussions with Drs. Tom Holtz and John Merck. Not only have I gained fundamental knowledge about the “nature of science, and the science of nature,” but I have even used html code and the Washington, D.C. metro system for the purposes of this program. ELT has continued to be a rewarding experience from day one.
