## CPSP218G Digital Image Processing Software Proof of Concept Exercise

Thus far, my experience in the scholars program, specifically, in the Earth, Life and Time, has been a great one. ELT focuses on the natural history including the understanding of the natural world and how it relates to us. I've been able to use critical thinking skills to approach problems and been introduced to different methods of the natural historical sciences. Part of the scholars program, in addition to the academic arena, is the integration of relationship and community building. The program promotes "Scholars in New York" where all the scholars programs take a trip to New York and take part in several activities. I participated in this trip and came back with new experiences and new friends from not only ELT but also from the other programs. The scholars program is a great balance between academic promotion and community building.
