

CPSP218G Earth, Life and Time Digital Image Processing Software Proof of Concept Exercise

Earth Life and Time has been a great experience for me. It has really made me appreciate my world around me. I have really enjoyed going on all the field trips. ELT has really inspired me to get involved and explore DC. My favorite trip thus far was the National Zoo. It really gave me a chance to get to know my peers and forced me to do something I probably would not have done otherwise.
