My experience in ELT has been one to remember. Dr. Holtz and Dr. Merck bring such a unique and lively energy into each lecture that makes me eager and passionate to learn about the different (and sometimes controversial) aspects of science. The field trips add a whole new dynamic and range from the structured methodology of the museum to the hands – on fossil hunting on the sides of highways! ELT has changed my way of thinking on the world and encourages me to learn all sides of the story before coming to a conclusion. I have learned a lot from the program and do not plan on stopping! It will be really fun to see what areas of science will be tapped in the coming weeks in ELT.
