Concept Exercise  
Sophia Sadiq

So far my experience in Earth, Life, and Time has been great. The curriculum is very different from my other classes; it is very interesting and can actually be applied to the real world. The program has allowed us to go on field trips and have experiences that many college students are not lucky enough to have. Last year I went to the Maryland Science Center and the National Zoo, I had been to both these places as a child, however when I went with ELT I saw the two sites from a new point of view, which was both educational and fun.
