

**SARAH SEGCEL**

**CPSP218G Digital Image Processing Software  
Proof of Concept Exercise**

Over the past two and a half semesters, my experiences in ELT have been very rewarding. Several field trips have allowed me to experience aspects of Maryland and science that I never would have known about without ELT. I think that it has been very worthwhile taking this class, as it has taught me not only about the world we live in, but also practical applications, such as how to start and maintain my very own webpage. The class itself has opened my eyes to a larger view of the wonderful world of science!
