*Through my many experiences in ELT I have been able to learn a lot about my character and grow as an individual.*

*1) Service Day helped me to realize that I enjoy meeting new people and giving back to my community. My time at Kentilworth Aquatic Gardens made me feel as if I was apart of something great and that was why my sophomore year I volunteered as a Service Day team leader.*

*2) One of the main aspects of the Scholars program was to create a live and learn community and I think that the program has been very successful because a majority of people in ELT are in similar classes with we are able to form study groups and assist one another when necessary.*

*3) I never thought that I would find geology interesting because I never thought rocks offered anything intriguing to learn about and I doubt that I'm the only one. But through ELT field trips to West Virginia for fossil hunting, Sideling Hills, and the Smithsonian I realized that through geology one could learn how new islands form, through analyzing different stratas a lot can be learned about evolution and the diversification of organisms.*

*4) Through our family history project where we traced ourselves back to year 1 CE, during this time I learned how to use history to trace hman inter- actions*

*5) Most importantly ELT has given me the opportunity to meet and interact with the wonderful Dr. John Merck and Dr. Thomas Holtz, who have made colloquium very entertaining.*
