

CPSGIOI CARBON FOOTPRINT INFOGRAPHIC - AADARSH GOVADA

CURRENT ME

As an individual living in a college dorm room and having little need for transportation or travel, my carbon footprint is 99.26% composed of household and food, with only 0.73% from transportation and travel.

PERCENT INCREASES

~313%
(12.61 metric tons)

~45100%
(9.02 metric tons)

~9600%
(0.96 metric tons)

FUTURE ME

As a member of a four-person household with full-time employment, my household and food consumption will increase corresponding to the more populated household. Additionally, my need for transportation will increase from not living on a college campus, and as an adult I will travel more than I am currently able.
