

# CPSG101 Carbon Footprint Infographic

Chris Liu

	<i>ME (CURRENTLY)</i>	<i>MY FUTURE FAMILY (6 PEOPLE INCLUDING MYSELF)</i>
<i>OVERALL CARBON IMPACT</i>	<i>9.75 TONS OF CO2/YEAR</i>	<i>12.2 TONS OF CO2/YEAR</i>
<i>HOUSEHOLD AND FOOD IMPACT</i>	<i>4.71 TONS OF CO2/YEAR</i>	<i>6.44 TONS OF CO2/YEAR</i>
<i>TRANSPORTATION IMPACT</i>	<i>0 TONS OF CO2/YEAR</i>	<i>0.56 TONS OF CO2/YEAR</i>
<i>TRAVEL IMPACT</i>	<i>0.04 TONS OF CO2/YEAR</i>	<i>0.2 TONS OF CO2/YEAR</i>

The reason for the increased impact for my future family is because we will be using more energy and eating more to support all of our children. We will also be traveling a lot more, therefore each category's CO2/year impact has increased.
