

CSPG101 CARBON FOOTPRINT INFORGRAPHIC

Comparison of Carbon Emissions Now vs Future

Current Me

- 1 Car (5000 miles)
- Lives in Dorm
- Travel by foot most places
- No long Range Travel
- 14.3 tons of CO₂

Future Me

- 2 Cars (40000 miles)
- Single Family House with several residents
- Travel by car most places
- Energy efficient house
- Leisure Travel
- 40 ton of CO₂
- Leisure Purchases

Why this will happen

As I move from college to my career, the increase in my economic status might lead to greater consumption and a higher carbon footprint. As my income rises, I will likely find myself making more purchases, living in larger homes, and embracing a more energy-intensive lifestyle, including increased travel and luxury's.
