

CPSG101 Carbon Footprint Infographic

By: Jace Persing

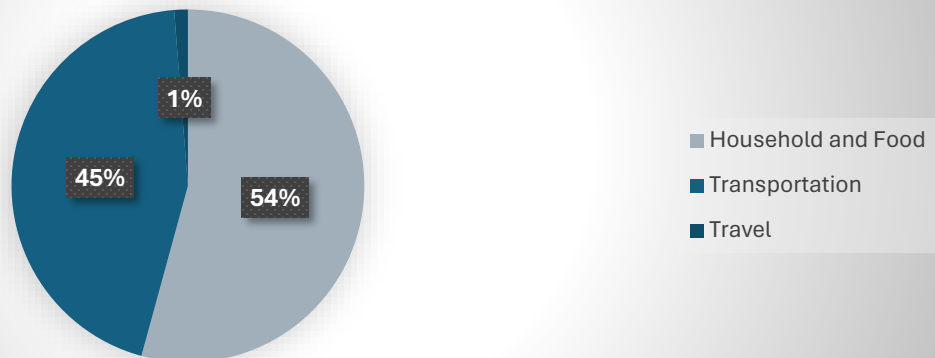

Current Carbon Footprint

Current Total Carbon Footprint

Future Family Carbon Footprint (4 People)

Future Family Total Carbon Footprint

- I plan to live in a smaller house when I get older and harness more power from solar and wind which will reduce the Carbon Footprint for Household and Food.
- When I get older, I will have a full-time job and I will own a car which means I will drive more which will increase my Carbon Footprint for Transportation.
- Once I have Children, we will probably go on family vacations which means I will have to use an Airplane to get to my destination.
