

CPSG101 Carbon Footprint Infographic

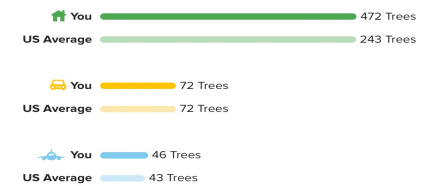

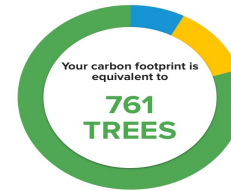

Khuong Nguyen

Present

Future (4-person household)

Household

My household carbon footprint is so low because I live with a lot of people in the dorms.

Household

My household carbon footprint is so high because I want to live in a big single-family home. My household carbon footprint per capita is 118 trees.

Transportation

My transportation carbon footprint is so low because I live on campus and don't drive often.

Transportation

My transportation carbon footprint is average because in the future I plan to drive as much as an average American. My transportation carbon footprint per capita is 18 trees.

Travel

My travel carbon footprint is so low because being a busy college student, I don't take many trips.

Travel

My travel carbon footprint is a little higher than average because I plan on travelling a little more than the average American. My travel carbon footprint per capita is 11 and a half trees.
