

Due May 16

819 paper assignment: Discuss some phenomenon that (plausibly) involves ellipsis. Lay out the pattern and articulate the generalization(s). Then possibly show how it bears on some analysis or argument we have seen (supporting or causing difficulties). Propose an analysis (perhaps just an extension or application of an existing one). If you have a complete solution, great! But this is not required. A plausible direction for a solution, with some pros and cons, will suffice. Finally, make sure to reference some relevant literature.
