

All measurements are in metric tons of CO2 per year

CPSG101: Carbon Footprint Infographic

Orande Sherman

This is a quick comparison of my carbon footprint now, and a hypothetical 30-year-old me that lives in a household of 3

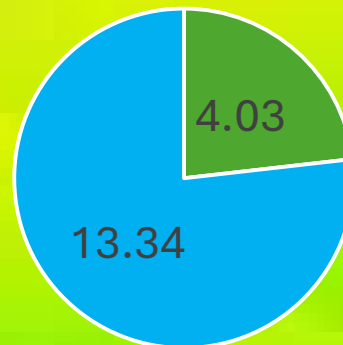

Total Carbon Output

■ Now ■ 30 year old me

Supporting a household of 3 is quite ecologically taxing!

Home Carbon Output

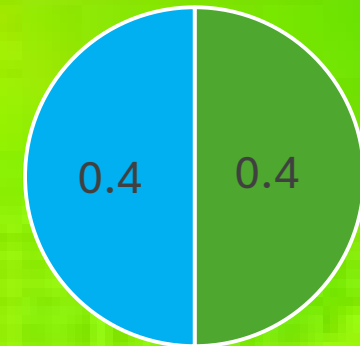

■ Now ■ 30 year old me

I care very little for flying, so I don't plan on doing it in the future any more than I do now

Flight Carbon Output

■ Now ■ 30 year old me

Currently, I don't need any consistent travel mechanism other than walking. In the future that won't be the case

Travel Carbon Output
