

# Carbon Footprint

Now:

Lifestyle:

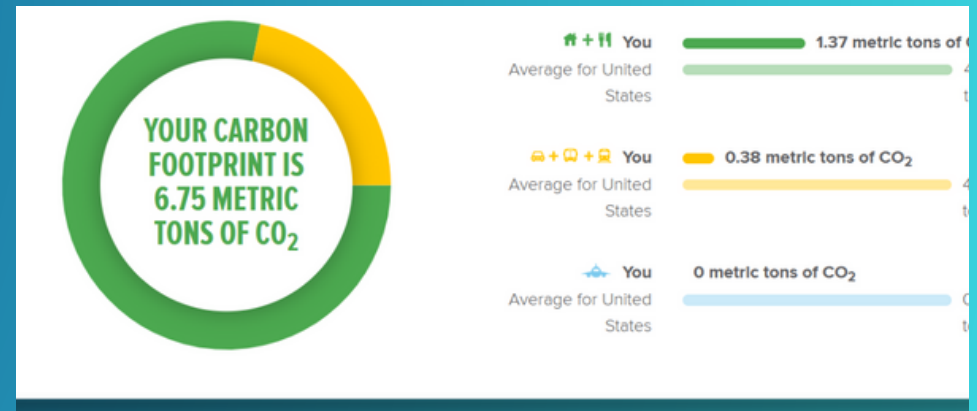

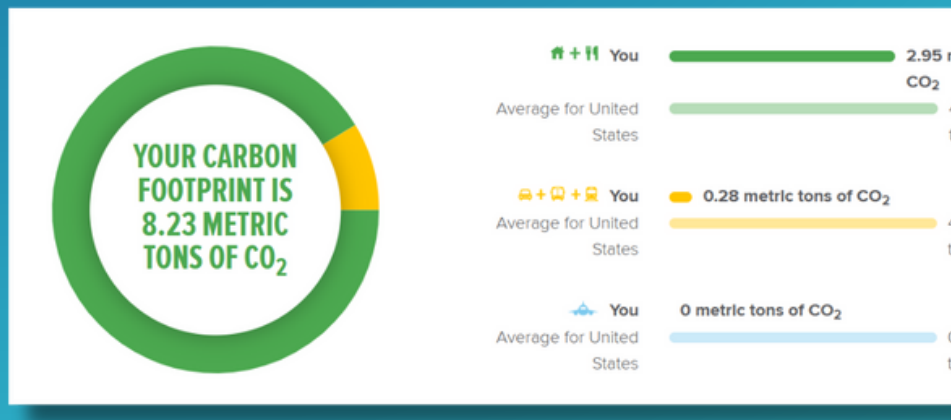

Student at UMD living in a dorm room

Vegetarian

Drives home every weekend

Walks most places

Does not travel by plane

In 20 years:

Lifestyle Changes:

Civil Engineer living in an Apartment/Townhome in a large city  
Travels using the Bus and Metro  
Live with my family of 3-4  
Most of my energy is from solar power

Conclusion:

While I have a smaller carbon footprint than most, I could improve it by investing in solar power, using public transportation, and living in an apartment
