

# CPSG101 Carbon Footprint Infographic

## Carbon Footprint

### Now

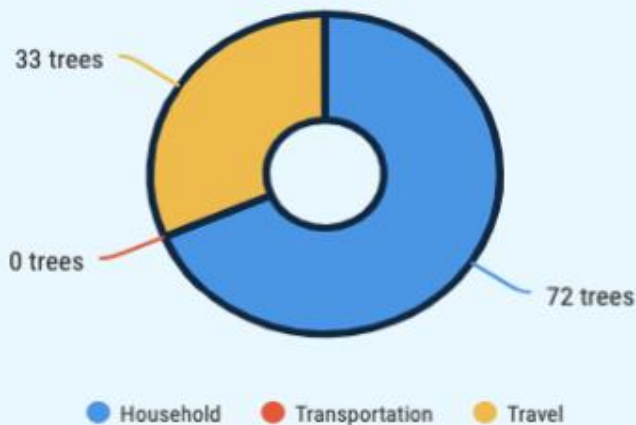

11.38 tons CO<sub>2</sub>/yr  
163 trees

### Future (4 members)

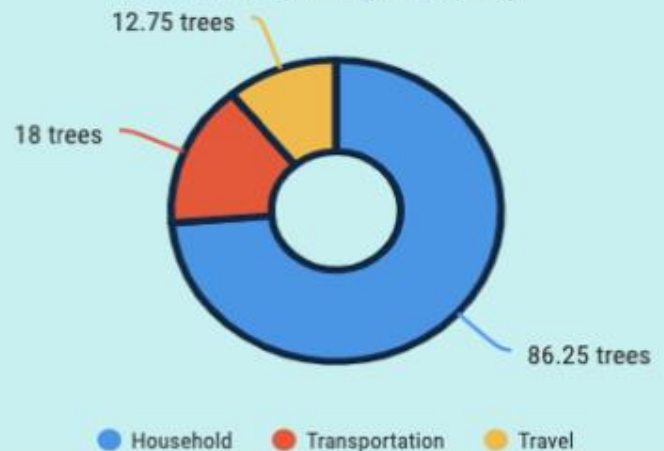

44.78 tons CO<sub>2</sub>/yr  
640 trees

**Per Capita -**  
11.20 tons CO<sub>2</sub>/yr  
160 trees

Current Footprint

Future Footprint (per capita)

## Factors that contributed to the change

In the future, everything will be split 4 ways, decreasing the footprint for each person individually.

- Resources such as electricity and water will be shared evenly among everyone.
- Purchase products in larger quantities reducing packaging waste.
- Don't need to travel individually, but as a group instead
