

# Carbon Footprint Infographic

By: Sion Mathew

## Current Carbon Footprint

- Diet: Average Omnivore
- Family Size: 6+
- Renewable Power: : 1-49%
- Size of Housing: Over 4000"
- Annual distance traveled by car: 0
- How much traveled by air: 0

**Total Carbon Footprint: 9.61tons of CO2 per year**

The reason for these differences is due to the fact that right now I'm living in a college dorm and my future carbon footprint is just how I envision my future footprint to look like.

## Future Carbon Footprint

- Diet: Average Omnivore
- Family Size: 4 or 5
- Renewable Power: 0%
- Size of Housing: 1500-1999"
- Annual distance traveled: 246 miles
- How much traveled by air: 8029

**Total Carbon Footprint: 25.84 tons of CO2 per year**
