Acknowledgement of Assistance

All manuscripts utilizing data made available through the “Zentralarchiv fuer empirische Sozialforschung“ should acknowledge that fact as well as identify the original collectors of the data. We kindly ask all users to follow some adaptation of the following statement:

The data utilized in this (publication) were documented and made available by the ZENTRALARCHIV FUER EMPIRISCHE SOZIALFORSCHUNG, KOELN. The data for the 'ISSP' were collected by independent institutions in each country (see principal investigators in the study-description-schemes for each participating country). Neither the original data collectors nor the ZENTRALARCHIV bear any responsibility for the analyses or conclusions presented here

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about research activities based on the ZENTRALARCHIV's holdings, each user is expected to send two copies of every completed manuscript to the ZENTRALARCHIV.

The production and documentation of the annual ISSP integrated files are done in alternating years by the Zentralarchiv fuer empirische Sozialforschung as the archive of the ISSP, Cologne, Germany, and by ASEP/JDS, Madrid, Spain. The present codebook and data file for the ISSP module 2003 (National Identity II) were produced by ASEP/JDS.

Please note

All marginal frequencies in this documentation are calculated from **unweighted data!**

Please also consider that - especially in the section of the background variables – identical value codes of certain variables may not always have the same meaning for each country. Such country-specific differences are documented in this codebook.

An Introduction to the ISSP - the International Social Survey Programme

The ISSP is a continuing annual programme of cross-national collaboration on surveys covering topics which are important for social science research. It brings together existing social science projects and coordinates research goals. Thereby the ISSP adds a cross-national, cross-cultural perspective to the national studies. As of 2004, thirty-nine countries are members of the ISSP.

The founding stones of the ISSP were laid in 1983 when SCPR, London, secured funds from the Nuffield Foundation to hold meetings to further international collaboration between four existing surveys - the General Social Survey, conducted by NORC in the USA, the British Social Attitudes Survey, conducted by SCPR in Great Britain, the Allgemeine Bevölkerungsumfrage der Sozialwissenschaften, conducted by ZUMA in West Germany and the National Social Science Survey, conducted by ANU in Australia. Prior to this, NORC and ZUMA had been collaborating bilaterally on a common set of questions since 1982.

The founding members agreed (1) to jointly develop modules addressing important areas of social science, (2) to field the modules as fifteen-minute supplements to the regular national surveys (or a special survey if necessary), (3) to include an extensive common core of background variables and (4) to make the data available to the social science community as quickly as possible.

Each research organisation funds its own costs, there are no central funds. Merging and archiving of the data into a cross-national data set is performed by the Zentralarchiv fuer Empirische Sozialforschung, University of Cologne. Since 1997, the Zentralarchiv and the Spanish institute ASEP (Análisis Sociológicos Económicos y Políticos) share the task of merging the national data sets.

Since its conception in 1984, 40 nations have participated in the ISSP: the founding four - Australia, Germany, Great Britain and the United States - plus Austria, Bangladesh, Brazil, Bulgaria, Canada, Chile, Cyprus, the Czech Republic, Denmark, Finland, Flanders, France, Hungary, Israel, Ireland, Italy, Japan, Latvia, Mexico, the Netherlands, New Zealand, Norway, the Philippines, Poland, Portugal, Russia, the Slovakian Republic, Slovenia, South Africa, South Korea, Spain, Sweden, Switzerland, Taiwan, Uruguay and Venezuela.

The topics for each ISSP survey are developed over several years by a committee and are pre-tested in various countries. The annual plenary meeting of the ISSP then adopts the final questionnaire. ISSP questions have to be relevant to all countries and must be expressed in an equivalent manner in all languages. The questionnaire is originally drafted in British English and then translated to the languages of the member countries.

The ISSP marks several new departures in the area of cross-national research: (1), the collaboration between members is organised in a stable framework.(2), the ISSP makes cross-national research an integral part of the research agendas of participating countries. (3), by combining a cross-time perspective with a cross-national perspective, two powerful research designs can be used to study societal processes.

ISSP Modules 1985 - 2007

Surveys Already Fielded and Archived

ISSP 1985	Role of Government I	ZA No. 1490
ISSP 1986	Social Networks and Support Systems	ZA No. 1620

Study Descriptions

To differentiate countries in the cross tabulations within this codebook we have decided to use the international ISO codes:

Australia	AU
Austria	AT
Bulgaria	BG
Canada	CA
Chile	CL
Czech Republic	CZ
Denmark	DK
Finland	FI
France	FR
Germany (West)	DE-W
Germany (East)	DE-E
Great Britain	GB
Hungary	HU
Ireland	IE
Israel	IL
Japan	JP
Latvia	LV
New Zealand	NZ
Norway	NO
Philippines	PH
Poland	PL
Portugal	PT
Russia	RU
Slovakian Republic	SK
Slovenia	SI
South Korea	KR
South Africa	ZA
Spain	ES
Sweden	SE
Switzerland	CH
Taiwan	TW
Uruguay	UY
USA	US
Venezuela	VE

Study Description: Australia*Study title:* ISSP 2003 National Identity*Fieldwork dates:* Start: 27 August 2003
Finish: 24 December 2003*Principal investigators:* Rachel Gibson, Australian National University
Shaun Wilson, Australian National University*Sample type:* The sample was stratified by Australian states and territories using population counts from the 2001 Census. The selection of individuals within the stratified sample was random using the Electoral Roll for Australia produced by the Australian Electoral Commission (AEC). The 2001 version of the Electoral Roll was updated for 2002 where state and territory elections had taken place. This frame includes all registered voters who must be citizens of Australia (or a British subject on a Commonwealth electoral roll as at 25 January 1984). Since voting in Australia is compulsory, there is a very high proportion of the adult Australia population covered by this frame—approximately 92 percent in 2003.

The sampling method used a random number generator inserted as a field in the electoral roll database; individuals were sorted using the random number and then selected in order. The sampled units were named individuals.

Fieldwork Institute: Australian Social Science Data Archive*Fieldwork methods:* Self-completion, paper and pencil, mailed to, mailed back by respondent*Sample size:* 2183*Response rates:*

5696	A - Total issued
796	B – Not eligible (ill, dead, non-English speaking, not at this address)
4900	C - Total eligible
2183	D - Total ISSP questionnaires received
2717	E - non-responses (including non-contact; see note above under “sample type”)
283	F - Refusals (including questionnaires less than half filled in)
2374	G - Non-contact (included in “E”)
60	H - Other non-response (included in “E”)

Language: English*Weighted:* No*Weighting Procedure:*

*Known Systematic
Properties:*

Gross sample

Using a sampling frame derived from the AEC Electoral Roll (2001) excludes permanent and temporary residents of Australia (who are not citizens) and any other adults in Australia who are non-citizens except for British subjects on a Commonwealth electoral roll as at 25 January 1984. These exclusions amount to approximately 8 percent of the adult population.

Net sample

The AUSSA 2003 sample demographics were compared with statistics available from the Australian Bureau of Statistics (ABS) including the 2001 Census. The major biases are: age (median age is older than the Census population), education (over-representation of persons with post-secondary school qualifications), and gender (slight over-representation of women).

*Deviations from ISSP-
questionnaire:*

For V4-V6 “Most important group R identifies with”, the response categories were converted from numbers to letters (A, B, C....) after a piloting experiment revealed greater respondent accuracy with the latter.

V8 “How close do you feel...”: response category was State or territory (appropriate internal regional breakdown for Australia).

V10 “How close do you feel...”: response category was Asia (since Australia is both a continent and country)

All changes were approved by the ISSP prior to the fielding of the Survey.

Publications:

Gibson, R. et al. The Australian Survey of Social Attitudes, 2003 [computer file]. Canberra: Australian Social Science Data Archive, The Australian National University, 2004.

ISSP Characteristics of National Population: Australia

The following data are made available to the ISSP from statistics derived from the Australian Bureau of Statistics (ABS) publications including the June 2001 Census. Please note that the ABS does not compile data on years of schooling completed. In its place, we have used educational attainment data (see Table 3) to provide meaningful comparisons between the AuSSA 2003 sample and ABS data. For further information, please contact Shaun Wilson at Shaun.Wilson@anu.edu.au

Table 1: Sex distribution of AuSSA sample versus Australian population (18 years and over)

	<i>AuSSA 2003</i>	<i>ABS – Census June 2001</i>	<i>difference</i>
Male	46.9	49.1	-2.2
Female	53.1	50.9	+2.2

<i>Sample type:</i>	Stratified Random
<i>Context of ISSP questionnaire how it is in the hard copy questionnaire</i>	National Identity with Citizenship
<i>Fieldwork methods:</i>	Self-completion Mail
<i>Sample size:</i>	Achieve sample 1069 cases
<i>Sampling method</i>	A stratified random sample (by province by gender) of 3,000 Canadian residents was purchased from <i>Cornerstone List Brokerage</i> , based on residential phone listings. (% of Canadians without phones < 2%)

The design consisted of two mailouts and 1 reminder notice.

The first mailout of 3,000 packages was mailed on January 29, 2004 and included a questionnaire, explanatory letter printed on the front cover and a postage paid return envelope. On February 10th a reminder postcard was mailed out to the entire sample. On February 26th a second mailout was sent to the respondents who had not returned their survey along with a additional letter explaining the importance of their participation in the project.

Study Description: Chile

Study title: Second National Public Opinion Study 2003

Fieldwork dates: December 6th to 24th 2003

Principal investigators: Carolina Segovia, Carla Lehmann and Paulina Valenzuela of Centro de Estudios Públicos

Sample type: The guiding methodological principle underlying CEP's public opinion surveys is that effective and accurate survey research must be based on a truly representative sample of the universe in question. For CEP's purpose, this universe is made up of Chilean adults 18 years of age and older. Our studies use a probability multistage cluster sample of 1,505 individuals.

The sample is designed in three stages, such that all adult individuals throughout the country have a calculable probability of being included. The 2002 Census data is consulted to determine the regional population structure of people 18 years of age and older. This makes it possible firstly to establish regional stratification and then each region is stratified by rural and urban zone. Table I shows the regional structure of the Chilean population.

Table I**Regional Breakdown of Population (%)**

Region		% Population 18 years of age and older ¹		Region		% Population 18 years of age and older ¹	
I	Tarapacá	2,8		VII	Maule	5,9	
II	Antofagasta	3,2		VIII	Bío Bío	12,2

V	Valparaíso	10,4		XI	Aisén	0,6	
VI	Libertador Bdo. O'Higgins	5,1		XII	Magallanes and Antarctic	1,0	
XIII	Metropolitan (Santiago)	40,7					

¹Source: 2002 Census Data National Institute of Statistics.

Sampling Stages

First Stage

The first stage of the sampling process sets the number of completed interviews per cluster at 5; a cluster is defined as a block (manzana) or populated entity (entidad).¹ The application of 5 interviews per cluster to the total number of interviews targeted in the sample (1,505) yields

¹ Bloc_ks (manzanas) are used in urban areas, while in rural areas the census equivalent is the entity (entidad).

301 primary sampling units (PSUs) to be identified in the first stage of sample selection.

The PSUs are proportionally distributed throughout the regions of the country, taking into account the region's contribution to population (both urban and rural), as described in Table II.

TABLE 2
Number of Clusters per Region

Region	Number of clusters		
	Urban	Rural	Total
I Tarapacá	7	1	8
II Antofagasta	10	0	10
III Atacama	5	0	5
IV Coquimbo	9	3	12
V Valparaíso	28	3	31
VI Libertador Bdo. O'Higgins	10	5	15
VII Maule	12	6	18
VIII Bío Bío	30	7	37
IX La Araucanía	11	6	17
X Los Lagos	14	7	21
XI Aisén	2	0	2
XII Magallanes and Antarctic	3	0	3
XIII Metropolitan (Santiago)	118	4	122
TOTAL	259	42	301

Using the most reliable digital information on hand, i.e. 2002 census data, a cumulative listing of population by province (provincia), borough (comuna), district (distrito), zone (zona) and block (manzana) was prepared in the urban case; and by province, borough, district, locality (localidad) and entity (entidad) in the rural case (geographically arranged).

In both the rural and the urban case a fixed interval is set for each region by dividing the total population for that region by the number of PSU's assigned to it. Within each region, a purely random selection process is followed, such that each individual (as represented by population statistics) has a calculable probability of being selected as the reference point for a PSU.

This is carried out through a computerised, random, proportionate-to-population process to select blocks in the urban areas and entities in the rural areas. A computer program is developed to select the 259 urban blocks and the 42 rural entities for the sample. All the blocks and entities are identified by number and located on a census map.

Second Stage

The second stage in the sampling process is to select households (dwellings) within PSUs. Selection rules for households within chosen blocks and entities are provided to interviewers, to enable them to select households randomly within each cluster. After taking a census of each selected block and entity, a random walk or systematic sampling² procedure is followed, whereby every *n*th dwelling is included in the sample until a total of 5 households are identified.

Third Stage

The third stage is to select, within each household, a person to be interviewed. Interviewers are instructed to apply a random selection process (random number table) to identify the person to be interviewed.

Other Important Aspects in the CEP Sample Design

In the second and third stages, the interviewer has to make a minimum of three attempts on three different days to try to reach the original house or person to be interviewed. In these attempts the interviewer must deliver a letter signed by the CEP director explaining the nature of CEP and the aims of the study.

If the original household or person finally cannot be contacted, they are replaced. The rules for replacement are as follows:

A. Blocks and Entities

The replacement of a block or entity will occur only in the following situations:

- 1) Vacant lots that could not be detected prior to sample selection
- 2) Areas which are almost inaccessible
- 3) Entities and/or blocks intended basically for commercial use
- 4) Parks or stadiums
- 5) Areas belonging to the armed forces

Blocks and entities are randomly replaced: the original selection is replaced with the one whose identification number comes immediately before that of the original. If this is not successful, the block/entity with the identification number immediately following the original selection is taken.

² The total number of numbered dwellings was divided by 5 (the number of interviews per cluster); this gave an interval length, such that if it was 43/5 = 8, starting from the point randomly pre-assigned as the first dwelling, the interviewers went to dwelling No 9, then to No 17, and so on until 5 interviews were completed.

B. Households

Failed dwellings are accounted for as follows:

- 1) by outright refusal to receive the interviewer, even having received the letter from the CEP director.
- 2) by the absence of occupants at a house after three visits on three different days (vacations or other reasons).
- 3) the house is unoccupied.
- 4) access denied (condominiums or buildings with security guards)
- 5) other special cases (foreigners with whom it is impossible to communicate, etc.)

Each failed dwelling is randomly replaced by another one from the same block/entity. The replacement interval is defined as $(k-1)$, where k = the original selection interval. Starting from the last house originally selected, the interval $(k-1)$ is added to select the first replacement house, and so on. The fieldwork treatment of replacement houses as regards the number of repeat visits is the same as for the original houses.

C. Individuals

Individuals are replaced under the following circumstances:

- 1) when the person selected refuses to answer the questionnaire, even after receiving the letter from the CEP director.
- 2) when the person selected cannot be located after three attempts on three different days, or will be away for a period longer than the duration of fieldwork.
- 3) the person offers to respond on a date long after the closing date of the field work.
- 4) individuals with serious physical or psychological handicaps which prevent them from responding (mentally handicapped, deaf and dumb, etc..)
- 5) the individual is physically and psychologically fit, but is ill, in bed and does not want, or is unable to respond to the survey.
- 6) the selected individual is a foreigner with less than 5 years in the country (unable to vote).
- 7) the person starts to answer but he/she does not want to finish the interview.

8) other specific cases.

In replacing individuals, the dwelling is replaced according to the rules explained above, and a random selection process chooses an individual from the new household.

It is important to bear in mind that, by using these replacement rules, the sample size achieved is always very close to 1505 (issued sample size).

<i>Context of ISSP questionnaire how it is in the hard copy questionnaire</i>	The National Identity 2003 module of the ISSP was carried out in conjunction with 24 questions relating to Chilean political, economic and social attitudes and tendencies. The questionnaire was structured as follows: firstly, the 24 questions mentioned above, the complete National Identity ISSP module, and, finally, demographic variables.
<i>Fieldwork methods:</i>	The surveys are carried out through personal interview.
<i>Sample size:</i>	The sample size finally achieved was 1505 interviews
<i>Response rates:</i>	<p>As was explained above in the section “Sample type”, the sampling method used by CEP involves the random replacement of those blocks/entities, dwellings or individuals, which for the reasons described above cannot in the end be contacted. Accordingly, keeping this in mind and using the method for counting the response rate established by the ISSP, we have that:</p> <p>A = 1,505 = Issue sample B = 0 = Ineligible A-B = 1,505 = C= Total eligible D =1,505= Sample achieved E = C-D= 0 Response rate = A/D = 1505/1505 = 100% Non-response rate = 0/1505 = 0.0%</p> <p>However, for the type of sampling used by CEP, these data are not real. CEP uses the following method for calculating the response rate.</p> <p>Let A = Number of original interviews achieved (not replaced) = 1,308 Let B = Number of non-original interviews achieved (replaced) = 197 Let C = Number of questionnaires received = A+B = Total sample = 1,505</p> <p>B = D1 + E1 + F1 + D2 + E2 + G + F2 = 197 where :</p>

D1 = Number of interviews replaced due rejection of household = 63
 E1 = Number of interviews replaced due to no contact in house (empty house + nobody comes to the door) = 59
 F1 = Number of interviews replaced for other household reasons = 11

D2 = Number of interviews replaced due to individual rejection = 28
 E2 = Number of interviews replaced due to failure to make contact with selected individual = 24
 G = Number of interviews replaced due to physical or psychological impediment of selected individual = 12
 F2 = Number of interviews replaced for other individual reasons = 0

No-response rate = Number of non-original interviews achieved (replaced) / total number of interviews (replaced + original)
 = $B / C = 197 / 1,505 = 13,1\%$

Language: Spanish

Weighted: No

Weighting procedure: A weighting procedure is applied in order to correct for distortions in the representativeness of the sample as regards three variables of interest: Gender, Age, (grouped in five categories: 18-24 years, 25-34, 35-44, 45-54, 55 or older) and Urbanity (classification of place of residence as urban or rural). This makes it possible to obtain a sample with characteristics similar to those of the population. The weights are constructed by calculating the quotient between the expected distribution and that observed in the cross between Urbanity, Gender and Age. The expected distribution is obtained from the 2002 census data provided by the National Institute of Statistics. The result of the weighting slightly corrects for problems of under- and over-representation among certain specific groups of the population.

Known systematic properties: The sample design described above has been used in the last 17 surveys and has given good results, so it can be stated that it does not have properties that might be causing some type of bias in the results.

Deviations from ISSP-questionnaire:

The questionnaire was translated as closely as possible from English to Spanish, maintaining the meaning and significance of each sentence and word.

Some general comments:

- In questions Q2, Q3, Q4, Q5, Q6, Q7, Q9, Q10, Q11, Q15 and Q16 the code “can’t choose” was replaced with “don’t know” (8) and “no answer”.(9)
- Due to problems detected in the pre-test, the question Q12 was finally translated as follows “From what country/countries or part(s) of the world did your direct ancestors, like your parents, grand parents, or great grand parents, come?”.
- Q12 is an open-ended questions, thus the data submitted present a very wide range of codes, so researchers can group them as they want to.
- Q8 was not included in the final version of the questionnaire due to translation problems detected in the pretest.
- Regarding Q1: Due to problems detected in the pre-test this question was asked at the end of the National Identity Module.

DEMOGRAPHICS VARIABLES:

- MARITAL : The code 3 is "ANULADO": In Chile we don't have divorce
- UNION : The code 2 was not included.
- INCOME and RINCOME : In these questions, incomes were measured like monthly net - income.
- ISCO88 and SPISCO88 : The answers were coded with 4 digit when it was possible.
- RCH_PRTY : The codes are :

VALUE LABELS RCH_PRTY

- 01 Independent National Alliance
- 02 Communist Party of Chile
- 03 Christian Democratic Party'
- 04 'Humanist Party
- 05 Democracy Party PPD
- 06 Radical Social Democratic
- 07 'Chilean Socialist Party
- 08 National Renewal Party
- 09 Independent Democratic Union'
- 10 Other party
- 11 No party, no preference
- 98 Don't know
- 99 'NA'.

- URBRURAL: It was added new codes, 6 for “Urban, RP total urban” and 7 for “Rural, RP total rural”.

ISSP Characteristics of National Population: Chile

	(%)
Gender	
Male	48,5
Female	51,5
Age Group	
18 - 24	16,3
25 - 34	22,9
35 - 54	38,6
55 or older	22,2
Years of Schooling - Group	
0 - 3 years	11,0
4 - 8 years	26,1
9 -12 years	38,9
13 or more years	24,0
Employment Status	
Employed (5.675.130)	92,6
Unemployed (453.070)	7,4
Total Labour force (6.128.190)	100,0
Not in Labour Force (5.419.180)	47,0

Sources:

For Gender, age group and year of schooling: Census 2002 by National Institute of Statistics. Considers population 18 years of age or older.

For employment status: Estimated by National Institute of Statistics. Oct-Dec 2003.

Percentage "Not in labour force" is based on population 15 years of age or older.

Study Description: Czech Republic*Study title:* National identity II, ISSP 2003*Fieldwork dates:* 26.09.2003 – 19.10.2003*Principal investigators:* Klara Plecita,
Institute of Sociology, Academy of Sciences of the Czech Republic*Sample type:* Three stage stratified probability sampling:
1) Stratified probability sampling of election districts
2) Probability sampling of households in selected district
3) Sampling of household members based on a Kish grid*Fieldwork institute:* SC&C*Fieldwork methods:* Face-to-face*Sample size:* 1276*Response rates:*

2441	A - Total issued (total sample)
52	B - Ineligible (address vacant, wrong ages,...)
2389	C - (= A - B) Total eligible (in scope sample)
1276	D - Total ISSP questionnaires received
1113	E - (= C - D; = F + G + H) Total non-response
617	F - Refusals (refusing to take part)
297	G - Non-contact (never contacted)
199	H – Other non-response

Language: Czech*Weighted:* Yes*Weighting procedure:* Total weight is constructed from:
1) design weights based on proportion of household sizes
2) post-stratification weights based on region, sex, education, age, economical activity, and size of the community.
The weights were derived from data of the Czech Statistical Office.
Method: raking based on loglinear modelling*Known systematic properties of the sample:* Due to sampling design the probability of selecting a respondent is 1 / No. of members of his/her household. Due to response differences sex and education significantly differ from the know population characteristics. The biases was corrected by weighting.*Deviations from ISSP questionnaire:* All the core ISSP module and background questions were included. Please see the technical report (cz03info.doc) for specifications of selected country specific backgroun variables.*Publications:* not yet**ISSP Characteristics of National Population: Czech Republic**

Sample type: Sampling-procedure: A representative sample (simple random

sample) was drawn from the *Central Population Register (CPR)* – which is a national register of all Danish citizens – from which respondent's name and address were identified. Thus, the sampled unit was 'named individuals'. No stratification, clustering etc. was employed.

The fieldwork method was postal survey (self-completion). One reminder was sent out to respondents who had not returned the questionnaire. After this telephone interviews were attempted. If respondents were not reached, they were contacted at least five times before given up as "not meet". In total 88,0 percent of the interviews were completed by mail and 12,0 percent were completed as telephone interviews (cf. MODE-variable).

No substitutions were permitted at any stage of the selection process or during the fieldwork.

The questions in the module were asked in the prescribed order.

Sample size:

Issued: 2000

Achieved: 1322

Response rates:

The response rate is calculated to 66,4 percent.

Full productive interviews / (Issued names – (respondents moved, no forwarding address + respondents deceased)):

$1322 / (2000 - (6 + 2)) \times 100 = 66,4$ percent.

Description	(N)
Issued names	2000
Selected respondent moved, no forwarding address	6
Selected respondent too sick/incapacitated to participate	43
Selected respondent deceased	2
Personal refusal by selected respondent	430
Other type of unproductive reaction	197
Full productive interviews	1322

Language:

Danish

Danish study title:

"Om det at være Dansk"

Known systematic properties:

None known.

Study title: Suomi ja suomalaisuus (in Finnish)
Finland och att vara finländare (in Swedish)

Fieldwork dates: September 12th – November 28th, 2003

12th of Sep, 2003 questionnaires mailed
19th of Sep, 2003 thank you/reminder postcard sent to all respondents
8th of Oct, 2003 dead line of answering the questionnaire
13th of Oct, 2003 replacement questionnaires sent to non-respondents
5th of Nov, 2003 dead line of answering the replacement questionnaire
28th of Nov, 2003 last questionnaire received

Principal investigators: Raimo Blom, University of Tampere
Harri Melin, University of Tampere

Sample type: Target population: household population aged 15 to 74. Sampling design: a systematic random sample of individuals. Sampling frame: population register, sorting order: domicile code and birth date. Stratification: implicit geographic stratification. No clustering.

Fieldwork Institute: Statistics Finland, Helsinki

Fieldwork methods: Postal (both direction), self-completion, paper and pencil

Sample size: Issued: 2500

Response rates:

A – Total issued	2500
B – Ineligible (address unknown or living abroad)	6
C – Total eligible	2494
D – Total ISSP questionnaires received	1379
E – Total non-response	1115
F – Refusals	4
G – Non-contact	-
H – Other non-response	1111

Language: Questionnaires in Finnish and Swedish. Information on language from the population register. Finnish (2 362; 94,5 % of total sample) and Swedish (138; 5,5 % of total sample)

Weighted: Weight variables are included in the data-set. Basic data is unweighted.

Weighting procedure: The design of the survey was systematic sampling. In order to improve the efficiency of estimation and to reduce bias due to non-

response a calibration method was used for the creation of the weights.

The following marginal distributions of the population were used: 1) gender (male, female), 2) age classes (15–24, 25–34, ..., 65–74), 3) NUTS3 regions with following modifications: the Greater Helsinki Area was dealt as a separate region, 4) type of community (urban - semi-urban - rural). There are two weights available for calculations: 1) a weight that expands the results to the population level (the sum of the weights is the size of the population) and 2) a weight that doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data). Both of the weights are based on the same calibration process, only the scale differs.

Known systematic properties of the sample:

Sampling frame is updated and covers total population. A cross-sectional sample does not contain attrition by definition.

After having used our standard sampling procedures for over 20 years we have not encountered any bias due to using systematic sampling. Design effect of the sampling procedure ≤ 1 by definition.

Deviations from ISSP-questionnaire: The questionnaire included ISSP module with necessary background variables.

List of deviations and coding specifications compared to ISSP source questionnaire:

1) Age

Age is computed from a variable for year of birth in the Finnish questionnaire (FQ).

2) Marital

FQ asked separately a category for those living together (married or not married). They were recoded into same category. Added one code, 0 meaning other (FQ).

3) Wrktype

Added one code, 8 meaning don't know (FQ).

4) Spwrktyp

Added one code, 8 meaning don't know (FQ).

5) Hhcycle

The FQ asked separately on how many persons in the household, how many of them are 7-17 years old and how many children under 7 years of age there are in the household. Hhcycle includes combined information from these variables.

6) SF_reg

Added from register data describing the regions. FQ did not include question for this.

7) SF_size

Added from register data describing the population of the municipality. FQ did not include question for this.

8) Weight and weight_2

As described in the study description,

-[weight] is a weight that expands the results to the population level (the sum of the weights is the size of the population) and

-[weight_2] is a weight that doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data).

9) SF_ethn

Added from register data describing the ethnic identity (language code). FQ did not include question for this.

Study Description: Great Britain*Study title:* British Social Attitudes 2003*Fieldwork dates:* June to September 2003*Principal investigators:* National Centre for Social Research*Sample type:* Clustered random sample: addresses were selected with equal probability in a stratified clustered design. One person aged 18+ was interviewed per address.*Fieldwork institute:* National Centre for Social Research*Fieldwork methods:* The ISSP module is implemented as a self-completion questionnaire, completed by the respondent after the main face-to-face interview and collected by the interviewer.*Sample size:* 873*Response rates:*

2062	A - Total issued (total sample)
182	B - Ineligible (address vacant, wrong ages,...)
1880	C - (= A - B) Total eligible (in scope sample)
873	D - Total ISSP questionnaires received
1007	E - (= C - D; = F + G + H) Total non-response
569	F - Refusals (refusing to take part)
260	Face-to-face interview but no self-completion
79	G - Non-contact (never contacted)
99	H - Other non-response

Language: English*Weighted:* Yes

Weighting procedure: Addresses were selected with equal probability (except in Scotland where allowance was made for MOI – see below) but only one person interviewed at each address. Therefore weights need to be applied to correct for different number of adults at each address. The weights are calculated by the following formula:

$$\text{weight} = (\text{number of households at the address} * \text{number of adults in selected household}) / \text{MOI}$$

where MOI is the Multiple Output Indicator (MOI>1 indicates more than one household at the address).
Very large weights were capped and the weights were scaled to make the

weighted sample size equal to the unweighted sample size.

Known systematic properties of the sample:

Sample excludes Scotland north of the Great Glen.

Deviations from ISSP questionnaire:

V64 to V74, Ethnic and TopBot are not available.

The following variables were collected only if the respondent was not economically active/retired and the spouse partner was economically active/retired : SPISCO88, SpWrkTyp.

Park, A. et al (eds) (2004 forthcoming) *British Social Attitudes: the 21st Report* , in particular chapters by Tilley et al. and by McLaren and Johnson

Study Description: Hungary*Study title:* National Identity II.*Fieldwork dates:* 2003.02.28 – 2003.03.12.*Principal investigators:* Antal Örkény, ELTE University Budapest*Sample type:* We used probability sample, which was selected in multiple stages with proportional stratification. In the first stage, localities were chosen. In the second stage, the respondents were chosen from the localities with simple random sampling.**Creating the sample of localities:**

The regions formed the first strata, type of settlements were the second. The localities were chosen from these strata by random sampling. For every county at least 2 towns and 3 villages were selected. The 23 districts of Budapest formed a separate sampling unit.

Creating the sample of individuals:

After creating the locality sample, and deciding the required number of respondents for every locality, we used '*pre-selected addresses*' sampling methods for selection of respondents.

The number of respondents in the previously chosen localities was defined in accordance with the proportion of the population of the given strata – regions, and different types of localities (towns and villages) within the region.

The names and addresses were obtained from the Central Registry and Electoral Office with the help of simple random sampling.

To replace dropped-out addresses subsidiary addresses were chosen with 'random walk' method, based on the Leslie-Kish—key.

Fieldwork institute: TÁRKI RT Social Research Centre*Fieldwork methods:* mode of interview: face to face*Sample size:* number of respondents in the final ISSP file:1021*Response rates:*

YES

Weighting procedure: Exact description of the weighting procedure / algorithm
In order to correct the sampling error we computed a weighting variable taking into account the type of residence (Budapest, other city, village), sex (male, female), age (18- 29, 30- 39, 40- 49, 50- 59, 60- 69, 70- x) and highest level of educational (primary , secondary, tertiary). The weight of each cases was computed as $WEIGHT = (n/n') * (N'/N)$, where N = respondent above the age of 18 in the sample of 2001 census, N' = 1000, n = frequency of the population category in the census sub-sample the case belongs to, n' = parallel frequency in the 2003 National Identity II module of TARKI.

Known systematic properties of the sample:

Description of biases or other deviations of the sample
Table. 1. Crosstabulation of year of birth, type of residence, highest educational level and sex in the sample of 1000 in compare with the sample of Population Census Data in Hungary of 2000.

Table.1.a. Sex

	Sample (unweighted data)	Census
Male	44.2	48.8
Female	55.8	53.2
Total	100.0	100.0

Table 1.b. Type of residence

	Sample (unweighted data)	Census
Budapest	17.5	18.5
Other city	45.7	45.1
Village	36.7	36.4
Total	100.0	100.0

Table 1.c. Age categories

	Sample (unweighted data)	Census
18- 39	29.4	39.6
40- 59	36.7	35.5
60- x	34.0	24.9
Total	100.0	100.0

Table 1.d. Highest educational level

	Sample (unweighted data)	Census

Study Description: Ireland

Study title: National Identity II 2003

Fieldwork dates: 1st Oct 2003 to 15th Nov 2003

Fieldwork institute: Economic and Social Research Institute (ESRI)

Principal investigators: Nic Ghiolla Phádraig, Máire; Watson, Iarfhlaith
Social Science Research Center, University College, Dublin

Sample type: The sample used in the ISSP survey was selected as a three-stage clustered probability sample of the adult population drawn from the electoral register.

First stage of sample selection

At the first stage of sample selection the national population on the register was grouped into clusters with a minimum population size of 1,000 adults. (These clusters were based on the most geographically disaggregated areal units available in the country – the so-called District Electoral Divisions (DEDs)). These clusters with a minimum population size of 1,000 persons constituted the primary sampling units (PSUs). The PSUs were selected with a probability proportionate to size (PPS). A total of 100 sampling points was selected.

Second stage of sample selection

At the second stage of selection the target household was selected from within each PSU on a systematic basis using a random start.

Third stage of sample selection to identify the respondent

At the third stage we selected the target person for interview within household from within the set of persons aged 18 years or more using a so-called 'next birthday' rule. The 'next birthday' rule is a simple randomisation procedure which provides a randomly selected respondent in much the same way as a Kish grid etc.

Fieldwork methods: Face-to-face

Sample size: 1000

Known limitations: Using the Electoral Register as the population frame means that very recently generated households which are not yet registered on the list have, by definition, a zero probability of selection. This is not a major issue and is, in fact, common to all population lists. The data were reweighted using a minimum information loss program which controls, *inter alia*, for age; gender; household size (number of adults in the household); marital status; level of educational attainment; region; principal economic status. This reweighting scheme addresses any such small bias as may emerge from frame effects.

Response rates:

Total number of <u>starting</u> or <u>issued</u> names / addresses (gross sample size)	1,648
addresses which could not be traced at all / selected respondents who could not be traced	48
addresses established as empty, demolished or containing no private dwellings	40
selected respondent too sick / incapacitated to participate	
selected respondent away during survey period	
selected respondent had inadequate understanding of language of survey	
no contact at selected address	
no contact with selected person	
personal refusal by selected respondent	252
proxy refusal (on behalf of selected respondent)	
other refusal at selected address	
other type of unproductive reaction (please write in full details in the box below) [Most of these were 'soft' refusals where the respondent was not available for interview throughout the fieldwork period despite repeated call-back]	220
full productive interview (net sample size)	1,065
partial productive interview	23

Language: English

Weighted: Yes

Weighting procedure: The data were re-weighted using a minimum information loss algorithm called Gross. This is used in almost all surveys carried out by the Economic and Social Research Institute in Dublin. It is similar to the Calmar software prepared by Insee and is based on reconciling distributions in the data to column marginals. The control variables used in reweighting the ISSP were: number of adult sin the household, gender, age cohort (8 categories), marital status, level of educational attainment, principal economic status, and planning region.

Study Description: Japan

Study title: ISSP National Identity

Fieldwork dates: November 29 to December 7, 2003

Principal investigators: ARAMAKI Hiroshi, KOBAYASHI Toshiyuki
(NHK Broadcasting Culture Research Institute)

Sample type: Two-stage stratified random sample of Japanese 16 or older
First, urban and rural areas are divided into a number of groups (strata) based on similarities in local features and industrial structures. From each of those groups, streets and village-sections are again grouped together to form sampling units. From among such sampling units, 150 survey spots are selected at random. Then, from *the Basic Resident Registers* for these spots, 12 sample individuals aged 16 or over are selected according to a fixed random number.

Fieldwork institute: Central Research Services, Inc.

Fieldwork methods: Face-to-Face

Sample size: Issued 1.800, Achieved 1.102

Response rates:

1.800	A - Total issued (total sample)
103	B - Ineligible (address vacant, wrong ages,...) 18 respondents were not found 81 respondents moved somewhere else 4 respondents died
1.697	C - (= A - B) Total eligible (in scope sample)

Weighted: No

Deviations from ISSP questionnaire: SPISCO88 is not available.

Classification of Occupations (country specific)

1. Agricultural, Forestry or Fishery workers
Those who are engaged mainly in agriculture, forestry or fishery and family workers
2. The Self-Employed
Those who operate shops, restaurants, plants, etc. each with 9 employees or less, as well as their family workers
3. Sales or Service Workers
Employees or sales persons at shops, restaurants, department stores, etc.
Employees at barber shops, beauty parlors, places of amusement, etc.
Waiters and waitresses, housekeepers, transport conductors, station clerks, travel attendants
Sales persons, canvassers, bill collectors
4. Industrial Workers
(Skilled Workers)
Locomotive-engine and motor-vehicle drivers
Those engaged in such work as manufacturing, repairs, assembly, processing, printing, spinning, sewing, tailoring, packing and bailing
Carpenters, joiners, plasterers, cabinetmakers
(Manual/Unskilled Workers)
Laborers in mining, construction, manufacturing and transport
Street vendors, deliverymen, garbage collectors
5. Clerical and Technical workers
Clerical and technical employees of business firm, public organizations and governmental agencies
Section and division chiefs of business firms and organizations with 49 employees or less
Those engaged in transportation, such as pilots and navigators
Education-related personnel such as college lecturers, teachers and nursery governesses
Medical-related persons such as pharmacists and nurses
6. Business operators or Managers
Directors and managers with the post of section chief or above of government offices
Directors and managers of business firms and organizations with 50 employees or more
Those who operate business firms and organizations with 10 to 49 employees
Directors of a kindergarten, headmasters, chief teachers, college presidents
Captains and crew chief of ocean-going vessels and aircraft and of craft serving major domestic routes
7. Specialists, Free-lancers, etc.
Medical doctors, lawyers, judges, certified public accountants, college (assistant) professors
Artists (painters, performers, etc.) and masters of various arts
Those related to professional sports, religious activities, politics
Self-Defense force personnel, policemen

8. Housewives

Women engaged mainly in housework

×Women who live alone are put in category 10 (Jobless)

9. Students

High school students Higher professional school students, junior college students, university students, graduate school students, special school students and miscellaneous school students

×Those who attend night high school or colleges, while working in the daytime, are put in categories 1 to 7

10. Jobless

Those who are not now employed and those who live on pension, etc.

97. Refused

99. No Answer

*Job-holders Total of those listed in the items numbered 1 to 7

*Employed persons Total of those mentioned in the items numbered 3, 4, 5 and 6

Sampling procedure: The sample was randomly selected from the 2002 New Zealand electoral roll, which contains the names of all registered voters over the age of 18 years. The achieved sample is generally representative of the New Zealand population over 18 years of age, but people under 30 are underrepresented in the sample, while those over 30 are overrepresented, and the proportion of women is higher than in the population whereas the proportion of men is lower. The data have not been weighted to correct this biases. However, comparisons of unweighted survey results with results obtained from the sample weighted so that its age-sex distribution matched that of the New Zealand population over 18 (taken from the 2001 Census), showed only minor differences between estimates.

Survey administration procedure: The questionnaire together with a covering letter was sent to the 2200 selected participants on 11 September 2003. A reminder letter and another questionnaire were mailed to participants whose questionnaire had not been returned by 25 September. A second reminder and another questionnaire were sent to those who had not returned their questionnaires by 16 October. A final reminder letter (without an accompanying questionnaire) was sent to all remaining non-respondents on 4 November. The survey was closed off on 28 November, 12 weeks after the initial mailing.

National Population Characteristics: New Zealand

1. Age and Sex distribution of population

Source: NZ Department of Statistics, 2001 Census, National Summary.

2. Education of population is based on “highest school qualification”. The New Zealand Census does not contain any questions about years of schooling and this information is not available from any government source.

Source: NZ Department of Statistics, 2001 Census, National Summary.

3. Employment rate of population

Source: NZ Department of Statistics, 2001 Census, National Summary.

Study Description: Philippines

Study title: ISSP 2003 Module on National Identity in the Philippines

Fieldwork dates: March 10 – 25, 2003

*Fieldwork:**Location:*

The ISSP 2003 Module on Identity survey covers the entire Philippines and had four major study areas: National Capital Region (NCR), Balance Luzon (outside NCR), Visayas and Mindanao.

Timetable:

National Capital Region	- March 10 - 25, 2003
Balance Luzon	- March 14 - 25, 2003
Visayas	- March 15 - 23, 2003
Mindanao	- March 15 - 24, 2003

Respondents:

The gathered data through on voting-age through face-to-face interviews of voting-age adults (18 years old and above). It asked a host of questions about political, social and economic issues, some undertaken as regular indicators monitored over time and others reflective of current concerns as well as specific personal information. It also obtained information and background characteristics about the household, the household head and family members.

Sampling Method:

Sampling Sizes and Error Margins. An indicator of data quality used is the standard error of the estimate, on which the margin for sampling error is based. As survey statistics are mostly proportions, the key measure of data precision is the standard error of a proportion taken from a sample. It is computed as follows:

$$\pm Z * \sqrt{p(1-p)/n}$$

Where Z, at 95% confidence level is 1.96; p is the sample proportion estimate and n is the sample size. The overall sample size of 1,200 voting-age adults for each of the questionnaires gives a maximum error margin of $\pm 2.83\%$ at the 95% confidence level, assuming a simple random sampling design. The sampling error is at its highest when the true proportion being estimated is close to 50%.

The following approximate 95%-confidence margins for sampling error should be made when aggregating data at various levels:

	Sample Size	Error margin
Philippines	1200	$\pm 3\%$
National Capital Region	300	$\pm 6\%$
Balance Luzon	300	$\pm 6\%$

Visayas	300	±6%
Mindanao	300	±6%

However, somewhat higher error margins should be expected since multi-stage cluster sampling was used; this design-effect is not readily measurable through established statistical software.

Sampling scheme. The Philippines were divided into four study areas: National Capital Region(NCR), Balance Luzon, Visayas, and Mindanao. The sample size for each of the four study areas was 300 voting-age adults.

Multi-stage probability sampling was used in the selection of sample spots. The allocation of sample units in each stage was as follows:

	Sample Prov.	Sample Mun.	Spots	Probability Respondents
National Capital Region	-	17	60	300
Balance. Luzon	10	15	60	300
Visayas	5	15	60	300
Mindanao	5	15	60	300
	20	62	240	1200

For the National Capital Region

Stage 1. Selection of sample Precincts

For NCR's first stage, 60 precincts were distributed among the 17 NCR cities and municipalities in such a way that each city/municipality was assigned a number of precincts that was roughly proportional to its population size. An additional provision was that each municipality must receive at least one precinct.

Precincts were then selected at random from within each municipality with probability proportional to population size.

Stage 2. Selection of Sample Households

In each sample precinct, interval sampling was used to draw 5 sample households: A starting street corner in the precinct map was drawn at random.

The first sample household was selected randomly from the households nearest to the starting street corner.

Subsequent sample households were chosen using a fixed interval of 6 households in between the sample ones; i.e. every 7th household was sampled.

Stage 3. Selection of Sample Adult

For the third stage, in each selected household, a respondent was randomly chosen among the household members who were 18 years of age and older, using a probability selection table. In selecting the probability respondent in a household, only male family members were

pre-listed in the probability selection table of odd-numbered questionnaires; only female family members were pre-listed for even-numbered questionnaires; In case where there was no qualified probability respondent of a given gender, the interval sampling of households would continue until five sample respondents were identified.

For the rest of the Philippines

Stage 1. Allocation and selection of sample provinces

Balance Luzon was further divided into 5 regions: CAR + Region II, Region I, Region III, Region IV and Region V; Visayas into 3 regions: Region VI, Region VII and Region VIII; and Mindanao into 5 regions: Region IX, Region X + CARAGA, Region XI, Region XII and ARMM.

Using probability proportional to population size (PPS) of the region, the allocation of 10 provinces in Luzon, and 5 each in Visayas and Mindanao were as follows:

Luzon		Visayas		Mindanao	
CAR/REG II	1	Region VI	2	Region IX	1
Region I	1	Region VII	1	RegX+CARAGA	1
Region III	2	Region VIII	1	Region XI	1
Region IV	3			Region XII	1
Region V	1			ARMM	1
Non-quota	2		1		0
Total	10		5		5

The non-quota provinces were selected without replacement using probability proportional to their remainders. The remainders are the fractions derived when the proportion of the regions (based on their respective study area) are multiplied by 10 for Luzon, and 5 each for Visayas and Mindanao. For instance, if 1.45 is obtained for Region I, then 1 province is assigned to this region and the remaining fraction of 0.45 is included for the allocation of the non-quota province.

Given the quota for each region, sample provinces were then selected by PPS, without replacement. An additional provision is that each region must receive at least one province.

Stage 2. Allocation and selection of sample municipalities

Within each study area, 15 municipalities were allocated among the sample provinces. 15 were multiplied by the proportion of the provinces. The resulting integers became the number of municipalities in that province. If there were remaining municipalities to be allocated, they were distributed using probability proportional to the remainders. Sample municipalities were then selected from within each sample province with probability proportional to population size, without

replacement. An additional provision was that each province must receive at least one municipality.

Stage 3. Allocation and selection of sample spots

Once the sample municipalities were selected, 60 spots for each of the major areas were allocated among the sample municipalities. Using the quota set for spots in each region, the spots were distributed in such a way that each municipality was assigned a number of spots roughly proportional to its population size.

Luzon		Visayas		Mindanao	
CAR/REG II	8	Region VI	25	Region IX	10
Region I	8	Region VII	21	RegX+CARAGA	16
Region III	14	Region VIII	14	Region XI	17
Region IV	21			Region XII	9
Region V	9			ARMM	8
Total	60		60		60

If the chosen sample municipality/city is 100% urban based on the 1990 (latest) NSO classification, then sample precincts were systematically drawn from this city/municipality. Otherwise, sample barangays within each sample municipality were selected using simple random sampling without replacement.

If based on the National Statistics Office categorization, the chosen sample municipality/city was 100% urban in 1990 (latest), then sample precincts were systematically drawn from this municipality/city.

Otherwise, sample barangays within each sample municipality were selected with equal probabilities.

In the effort to update the urban-rural classification of barangays, the survey adopted a classification scheme slightly different from the official NSO definition. The interviewers were instructed to ascertain whether the barangay has the following:

- A. Street patterns, i.e. network of streets in either parallel or right angle orientation
- B. At least 6 establishments (commercial, manufacturing, recreational and/or personal services)
- C. At least three of the following:
 1. Town/Barangay Hall/Church/Chapel
 2. Public Plaza/Park/Cemetery
 3. Market Place
 4. Public building like school, hospital, health centre or library

If the barangay has all categories as A, B or C, then the barangay were classified as urban. Otherwise, the barangay was classified as rural.

Stage 4. Selection of Sample Households

For the fourth stage, within each sample spot, five households were established by systematic sampling. In sample (urban) precincts, a random corner was identified; a random start generated; and the interval was seven. In ascertained urban barangays (with no precinct maps), the designated starting point was the same as in rural barangays – it was a school, the barangay captain's house, a church/chapel or a barangay/municipal hall. The sampling interval for urban barangays was seven, while for rural barangays it was two.

Stage 5. Selection of Sample Respondents

For the fifth and final stage, as discussed earlier, a respondent was randomly chosen from among the voting-age adults in each selected household using a probability respondent selection table.

*Research
Methodology:*

a. Preparation

1. Questionnaire

The definitive language-version of the questionnaire, Tagalog, was translated into English, Cebuano, Ilonggo, Ilocano and Bicolano by language experts. Then the language translation was translated back to Tagalog by another set of experts to make sure that the messages were conveyed accurately.

2. Pre-Testing and finalizing the questionnaire

SWS pre-tested the questionnaire on 10 voting-age adults from different socio-economic classes in order to:

- Determine the time length of the interview
- Improve the wording of the questions, if necessary
- Eliminate unnecessary questions or add new items, as the case may be
- Test question sequence and identify biases
- Correct and improve translation
- Change open-ended questions into multiple choice questions
- Find out which items are conceptually vague
- Check accuracy and adequacy of the questionnaire instructions
- Determine whether the focus of the question is clear
- Identify interviewer's recording difficulties

3. Training

- (a) Training was conducted in 3 central locations: Manila, Iloilo city and Cebu City. The interviewers needed to cover Luzon were trained in Manila. They implemented the Tagalog and Ilocano versions of the questionnaire. Those trained in Iloilo covered Ilonggo-speaking regions, while those in Cebu City covered all of Cebuano-speaking areas (Central & Eastern Visayas and Mindanao).

- (b) Training time – The minimum training time for group supervisors and interviewers was 3 days prior to field implementation.
- (c) Training Activities – These mainly consisted of:
 - One or two day's office training to learn the basics of the project.
 - Mock interviews with co-workers to get accustomed to the flow of interviewing and questionnaire format.
 - Practice interviews with a supervisor until the interviewer could be left on her own.
- (d) Evaluation of interviewer's work – The interviewer was left to interview on her own only after she has conducted 3 successive interviews without committing any error in interviewing and recording.

b. Field Work

1. Supervision

Supervisors reporting to the field manager monitored the study full-time. They observed interviewers, (at least 10% of total interviewers were observed by supervisors), followed-up and did surprise checks on the field interviewers. They also ensured that field logistics were received promptly and administered properly.

2. Spot-checking

Spot-checking was done at various stages of fieldwork. The first one took place after about 30% of interviews were completed. The second spot-checking was conducted after 60% completion and the last one, immediately after 90% completion of interviewing. During spot-checking, at least 20% of the unsupervised interviews were reinterviewed/backchecked.

c. Number of calls and Substitution

A respondent not contacted during the first attempt was visited for a second time. If the respondent remained unavailable, a substitute who possessed the same qualities (in terms of gender, age bracket, and socio-economic class) as the original respondent was interviewed. The substitute respondent was taken from another household beyond the covered intervals in the sample precinct/barangay.

d. Field Editing

- (a). After each interview, the interviewer was asked to go over her own work and check for consistency.
- (b). All accomplished interview sheets were submitted to the assigned group supervisor who, in turn, edited every interview.
- (c). Data Processing
 - (1) An office editor conducted a final consistency check on all interviews prior to coding.
 - (2) Interview sheets were edited/checked twice by office editors before the information was encoded into diskettes.
 - (3) A data entry computer program verified and checked the consistency of the encoded data before data tables were generated.

Weighting procedure: To yield representative figures at the national level, census-based population weights were applied to the survey data. The weight projection was computed by dividing the projected population in the area by the sample size of the same area. Appropriate projected factors were applied so that original population proportion were reflected in the data tables using this formula:

$$\text{Projection factors (Weight)} = \frac{\text{Population}}{\text{No. of Interview}}$$

For questions answered by the sample voting-age adults, the following projection factors were used:

	2002 NSO Projected population Aged 18 and above	Total Sample size	Projection factor for 1 Probability Respondent (000)	Projection factor for 2 Probability Respondent (000)
NCR	6,926,430	300	23.0881014336	11.5440507168
Balance Luzon	19,631,544	300	65.4384809797	32.7192404898
Visayas	9,281,157	300	30.9371910397	15.4685955199
Mindanao	10,634,787	300	35.4492909369	17.7246454685
TOTAL	46,473,919	1,200		

The SPSS version of the data file is already weighted according to the above projection factors. As the data are weighted, the total number of cases that appear is 46,474. This figure is in thousands, i.e., 46,473,919 persons representing NSO's projected number of adults (18 years old and above) for year 2002 based on the 1995 Census.

Researchers who are defining data using the ASCII files should apply these projection factors.

Study Description: Poland

Study title: Polish General Social Survey/ISSP, 2003

Fieldwork dates: January, 2005

Principal investigators: Bogdan Cichomski, Institute for Social Studies, Warsaw University (ISS UW) and Warsaw School of Social Psychology (SWPS)

Sample type: Multi-stage area probability sample.
The sample was drawn from The Common Electronic Population Evidence System - PESEL (a governmental agency).

Sampling procedure consists of the three stages:

1. In each of the 16 voivodships in Poland places of living were divided up into three categories

- 1) capital of the region
- 2) other cities
- 3) villages

In voivodships with the higher number of people the class "cities" was additionally divided up into 2-6 smaller categories. In Mazowieckie and Slaskie voivodships there was also a division into two strata in the "villages" class.

As an effect there was 65 strata taking into consideration the administrative division of the country and type and size of the place of living.

Assumed sample size was divided up into the strata taking into consideration different completion rates in classes of places of living in voivodships. It means that from classes of places of living where the completion rates are known to be lower than in other there was an over-representative sub-sample sampled.

2. Then in CBOS (Public Opinion Research Center) cities and villages communes were sampled. After that in PESEL data-base some small areas of the cities and villages communes were sampled. Persons to be interviewed were chosen also from the PESEL data-base from the previously selected areas. In cities, small areas covered some streets and its neighborhood and in villages the areas of one village and/or some of its streets.

3. In each stratum at least two small areas were sampled. From each small area six adults living in different locations and in different households were sampled.

Fieldwork institute: Public Opinion Research Center (CBOS), Warsaw

Fieldwork methods: Self-administered supplement completed after the PGSS and face-to-face interview and after ISSP 2004 Citizenship which was also face-to-face (self-administered/interviewer attending =76,6%) + (face-to-face interview = 23,3%) and in one case the way stays unknown (that is 0.1%) [see MODE-variable in the Polish data file]

Sample size: 1277 = number of respondents achieved on ISSP 2003

Response rates:

2106	A - Total issued (total sample)
204	B - Ineligible (address vacant, wrong ages,...)
1902	C - (= A - B) Total eligible (in scope sample)
1277	D - Total ISSP questionnaires received
625	E - (= C - D; = F + G + H) Total non-response
218	F - Refusals (refusing to take part)
325	G - Non-contact (never contacted)
82	H - Other non-response

Language: Polish

Weighted: YES

Weighting procedure: Weighting procedure assumes that after weighting the sample size is equal to the number of completed interviews.

$$\text{weight: } W1_{is} = \frac{r_{is}}{\sum_{i=1}^n r_{is}} * n$$

where:

i – record ID , i=1,2,.....n

n – the number of completed questionnaires

N – the number of inhabitants who are 18 or older.

r_{is} - completion rate in the class of place of living s where the i interview was conducted.

$$r_{is} = \frac{LW_s}{LZR_s}$$

LW_s - sample size drawn in the class of the place of living s, proportional allocation assumed

LZR_s - number of completed interviews in the class of the place of living s

s – class of the place of living (s=1,2,.....,6)

s=1 - village

s=2 – cities up to 19999 inhabitants

- s=3 – cities 20000-49999 inhabitants
- s=4 – cities 50000-99999 inhabitants
- s=5 – cities 100000-499999 inhabitants
- s=6 – cities 500000 and more inhabitants

After stratification „ex post” for k-categories weights were calculated taking into consideration the structure of polled population on the basis of statistical data coming from the Central Statistical Office (GUS) in division for villages and cities, sex and age category.

$$W2_{i_k} = \frac{\left(\frac{X_k}{\sum_k X_k} \right) * 100}{\left(\frac{\sum_{i_k=1}^{n_k} W1_{i_k}}{\sum_{i=1}^n W1_{i_s}} \right) * 100}$$

$$\left(n = \sum_k n_k \right)$$

$$\left(n = \sum_{i=1}^n W1_{i_s} \right)$$

where:

X_k - number of people in k-category according to GUS data

$$X = \sum_k X_k$$

i_k - questionnaires by record ID which belong to the k-category

n_k - total number of questionnaires which are rated to k-category

$$WX_{i_k} = W1_{i_s} * W2_{i_k}$$

WX_{i_k} weight for i-respondent belonging to the k-category and drawn in s-class of the place of living.

Known systematic properties of the sample:

No biases or other deviation of the sample (after weighting) (see: National Population Characteristics, 18 years or older; POLAND). You can observe in the National Population Characteristics for Poland some deviations in two highest age categories which is caused by different age grouping for men and women and used for weight calculation.

Deviations from ISSP not asked: V58 (question 14), and ETNIC (background question).

questionnaire:

Publications: None

Study Description: Portugal*Study title:* Portuguese Social Attitudes 2003/2004*Fieldwork dates:* April to September 2004*Principal investigators:* Manuel Villaverde Cabral, Jorge Vala, Alice Ramos, all at Instituto de Ciências Sociais da Universidade de Lisboa.*Sample type:* Stratified random probability. The sample is designed to be representative of adults aged 18 or over living in private accommodation in Portugal. The sample method involved a multi-stage design: stratification by region and habitat; Selection of sampling units (100); selection of streets: selection of addresses by random root; selection of individuals by the last birthday method.

Stratification factors used:

- NUTES (North, Center, Lisbon and Tagus Valley, Alentejo and Algarve)

- HABITAT (less than 2.000 hab.; 2 - 10 thousand hab; 10 - 30 thousand hab; 30 - 100 thousand hab; more than 100 thousand hab)

In order to get a representative sample, near 50% of the interviews were made in habitats with less than 2000hab. Some problems came up, such as, a level of non-responses and refusals higher than expected.

Fieldwork institute: TNS-Euroteste*Fieldwork methods:* face-to-face interview with visuals*Context of ISSP Questionnaire:* Atitudes Sociais dos Portugueses (*Portuguese Social Attitudes*)*Response rates:*

Study Description: Russia

Study title: 'ISSP-2003 Module "National Identity II"

Fieldwork dates: July,01.-15,2003

Principal investigators: L.Khakhulina, Levada-Center

Sample type:

Description of the sampling procedure

Stratification procedure. Nationwide sample (N=2100) was divided among:

- a) 10 large economico-geographical macro regions proportionate to the size of the local population aged 16+ of each macro region
- b) 5 strata of rural districts and urban settlements* in each of 10 macro regions proportionate to the size of the local population aged 16+ of each stratum.

- * 1)less than 10,000; (rural districts & small urban settlements)
 2)from 10,000 – to100,000;
 3)from 100,000 – to 500,000;
 4)from 500,000 – to 750,000;
 5)over 750,000 inhabitants

Selection primary sampling units (PSUs). All cities over 500, 000 inhabitants were included in the sample as self-representative units. Urban and rural settlements were considered as primary sample units (PSUs). In each stratum (except strata of cities over 500,000 and 2 capital cities) the number of PSUs was calculated on the limitation of 15 interviews per PSU and the PSUs as well were selected with the probability to its sizes (the number of its inhabitants). The total numbers of interviews accounted for a stratum was distributed approximately equally among selected PSUs. **Totally 101 PSUs were selected.**

Selection of secondary sampling points (SSUs). Electoral districts were used as secondary sampling points In the cities over 500,000 inhabitants the number of surveyed SSUs was defined by condition of 7 interviews per SSU.. In the rest of selected PSU two sampling points were randomly selected from the list of all electoral districts of this PSU.

Totally 240 sample points were selected.

Selection of households. The households were selected by a random route method. If a household or a respondent refused to participate in the survey or not been achieved for 4 visits an interviewer should visit the next address from the rout in the selected districts.

Selection of respondents. Within a household a member with the nearest birthday was selected for interviewing. In order to reach a selected respondent an interviewer visited each address up to 3 times in different days of a week and at different time of a day.

The following categories were excluded from the gross sample:

- a)persons doing their military service by draft (about 1%)
- b) persons under imprisonment (about 0,8%)
- c)population of the areas under the war conflict in North Caucasus (1,9%)
- d) population of remote or difficult to access regions of Far North (0,9)
- e) rural localities with less then 50 inhabitants (0,8%)

Fieldwork institute:

Levada-Center

Fieldwork methods: Self-completion
Sample size: N=2400(2100 + 300 extra sample in Moscow)

Response rates:

5902	A - Total issued (total sample)
182	B - Ineligible (address vacant, wrong ages,...)
5720	C - (= A - B) Total eligible (in scope sample)
2408	D - Total ISSP questionnaires received

1328	G - Non-contact (never contacted)
331	H - Other non-response

Language: Russian
Weighted: yes, a weighting factor exists in the data set
Weighting procedure: exact description of the weighting procedure / algorithm

a) Main principles of weighting procedure

The total expected number N of respondents for a certain region being treated equal

$$N = N_0 * P,$$

where N₀ denotes the size of total sample, P - the share of the region population in the entire population.

As a result of correction, every respondent X[k] has the definite weight W[k], within the limits $0 < W[k] < \sim 10$, so that the following conditions were valid :

- 1) the value of $\sum(W[k])$ for the region concerned was equal to N
- 2) for every controlled group G[i] the value Q[i] being equal to $Q[i] = \sum(W[k] | X[k].\text{belong to } G[i]) / N$, was closed to a proportion P[i] of group G[i] in the region population

i.e. $Q[i] \sim P[i], i=1,2,\dots,16.$

The value of J

being equal to $J = \sum((Q[i]-P[i])**2) + (\sum(W[k])/N - 1)**2$, was used as the criterion for minimization on the weights` sets variety.

Study Description: Slovenia

Study title: Slovene Public Opinion Survey 2003/2: International Survey on Family and National Identity and Attitudes on Local Democracy

Fieldwork dates: February 2003 – March 2003

Principal investigators: Niko Toš, Public Opinion and Mass Communication Research Centre (CJMMK), Ljubljana.

Sample type: Universe: The adult residents of SR Slovenia, older than 18 years, living on permanent address. Excluded: Institutionalised people. Central Register of Population (a list of names and addresses constantly undated by public administration) is employed as a sampling frame. Sampling procedure: The sample is two-stage stratified random sample from Central Register of Population, where every population unit has equal probability of selection. First stage PSU selection is made by probability proportional to size of CEA (Clusters of Enumeration Areas). CEA are stratified according to 12 regions*6 type of settlement. At second stage systematic random selection inside CEA brings fixed numbers of persons with name and address. Split-halves samples were used for parallel SJM surveys.

Fieldwork methods: Personal interviews with trained interviewers

Fieldwork institute: Public Opinion and Mass Communication Research Centre (CJMMK), Ljubljana

Context of ISSP-questionnaire: ISSP 2002 questionnaire lie at the beginning of the SJM 2003/2 questionnaire. Then follows the ISSP 2003.

Study Description: South-Africa

- Study title:* 'official' title of the study/survey
South African Social Attitude Survey
- Fieldwork dates:* start and end date of field-work
August-September 2003
- Principal investigators:* Dr Stephen Rule
Human Sciences Research Council
- Sample type:* description of the sampling procedure
A sample of 3 500 respondents was selected throughout South Africa in groupings of seven and situated in 500 census enumerator areas (EAs) as determined in the 2001 census. Each EA was classified in terms of the dominant lifestyle category by the Human Sciences Research Council (HSRC) in its analysis of the 1996 census data. In order to ensure adequate representation in the sample from each province and from each of the four dominant population groups, the sample was stratified by province and by population group. Disproportionately large samples were selected from areas know to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape. Within the EAs, the seven households were randomly selected and within the household, the respondent were selected using a Kish grid.
- Fieldwork institute:* Human Sciences Research Council
- Fieldwork methods:* Face-to-face
- Sample size:* number of respondents in the final ISSP file
- Response rates:*
- | | |
|------|---|
| 3500 | A - Total issued (total sample) |

Study Description: Sweden*Study title:* National Identity II*Fieldwork dates:* February 2003 to April 2003*Principal investigators:* Prof. Stefan Svallfors and Dr. Lonas Edlund, Department of Sociology, Umeå University, Umeå, Sweden*Sample type:* Two representative samples of the Swedish population 17-79 years. The samples were subjected to different fieldwork methods, with obvious implications for the response rate.*Fieldwork institute:* SIFO*Fieldwork methods:* Separate postal survey with several reminders. Sample 1 received an introductory letter and a gift. The gift was free and was not associated with any obligations. See the below table for a detailed description. The samples can be separated by using the variable: S_MODE

Fieldwork details

		Sample 1	Sample 2
29/1	Introductory letter about the survey	X	
3/2	Postal survey		X
4/2	Postal survey + lottery ticket	X	
10/2	Postal reminder		X
11/2	Postal reminder + questionnaire	X	
24/2	Postal reminder + questionnaire		X
25/2	Postal reminder + questionnaire	X	
14/3	Postal reminder (+ questionnaire to those with unknown telephone numbers)	X	
17-27/3	Reminder by telephone		X
17-31/3	Reminder by telephone (+ questionnaire to those wishing a questionnaire)	X	

Context of ISSP questionnaire: Separate survey*Language:* Swedish*Weighted:* No*Sample size:* 1186*Known bias in data:* The response patterns for all variables have been subjected to χ^2 tests in order to track significant differences between samples 1 and 2 (not controlling for demographic differences). Differences in response patterns between the two samples are generally small. For all variables: $p > 0.10$, except v17 ($p=0.01$) and v39 ($p=0.07$).

Response rates in different demographic groupings are relatively

evenly distributed. However, the following may be noted: women and the young (higher than average response rate); men, the elderly, those living in Stockholm (lower than average response rate).

Special note on background variables referring to occupation

1. All occupational variables refer to the respondent's present or (if the respondent is currently not working) last occupation.
2. ISCO. 4-digit. Where information for 4-digit coding is not available, 3- or 2-digit codings have been applied, using zeros for the missing digits. Examples: isco code 733 is coded as 7330 in the datafile, isco code 73 is coded as 7300 in the datafile.

Stockholm (including the suburb municipalities)
Urban 1 (Municipalities (MC) with more than 90 000 inhabitants within an area of 30 kilometres radius from the MC centre)
Urban 2 (MC:s with more than 27 000 inhabitants and less than 90 000 inhabitants within an area of 30 kilometres radius of the MC centre and in the same time with more than 300 000 inhabitants within 100 kilometres radius of the MC centre)
Rural 1 (MC:s with more than 27 000 inhabitants and less than 90 000 inhabitants within an area of 30 kilometres radius of the MC centre and in the same time with less than 300 000 inhabitants within 100 kilometres radius of the MC centre)
Rural 2 (MC:s with less than 27 000 inhabitants within an area of 30 kilometres radius of the centre)
Göteborg region (Göteborg including the suburb municipalities)
Malmö region (Malmö, Lund, Trelleborg including the suburb municipalities)

Study Description: Switzerland*Study title:* ISSP 2003 National Identity'*Fieldwork dates:* May the 6th 2002 until August the 25th 2003*Principal investigators:* Institut SIDOS, Ruelle Vaucher 13, CH-2000 Neuchâtel*Sample type:* The ISSP 2003 survey was combined with the „Eurobarometer in Switzerland“ (EBCH) survey. The questions related to the „Eurobarometer in Switzerland“ were first asked followed by those of the ISSP 2003 using the CAPI method. The sampling procedure was the following:

- Stratification of the households into 6 regions (Espace Mittelland, North of Switzerland, East of Switzerland, Center of Switzerland and Italian-speaking part of Switzerland)
- Random selection of households from the extended phone register
- Sending of an information letter
- One half of the sample was contacted by the telephone central of the fieldwork institute and the other half per telephone or face to face from the interviewer to fix a date for the interview
- Random selection of one person in each household with the KISH method
- EBCH and ISSP Interview (CAPI)

Fieldwork institute: MIS Trend, Institut pour l'étude des marchés et les sondages d'opinion, Pont-Bessières 3, 1005 Lausanne*Fieldwork methods:* CAPI*Sample size:* 1037*Response rates:*

	A - 3640 (total sample)
	B - 497 (address vacant, wrong ages, sick, language,...)
	C - (= A - B) 3143 (in scope sample)
	D - 1037
	E - (= C - D; = F + G + H) 2106
	F - 1735 (refusing to take part)
	G - 224 (never contacted)
	H - 147

Language: German, French and Italian*Weighted:* yes

Weighting procedure: The weights were defined according to the following criteria:

- Size of household
- Age
- Gender
- Language
- Employment status

The estimation of size of household, age, gender, language is based on the Swiss federal census 2000 and the estimation of the employment status on the Swiss Labour Force Survey 2002.

The size of the household was recoded into the following four categories:

- 1) Household with 1 person
- 2) Household with 2 persons
- 3) Household with 3 persons
- 4) Household with 4 persons and more

The age was recoded into the following six categories:

- 1) 18-24 years
- 2) 25-34 years
- 3) 35-44 years
- 4) 45-54 years
- 5) 55-64 years
- 6) 65 and older

The language was recoded into the following five categories:

- 1) German
- 2) French
- 3) Italian
- 4) Rheto-roman
- 5) Other

The employment status was recoded into the following two categories:

- 1) Active
- 2) Non active

The weights result from the division of the expected through the observed value. This process was repeated until convergence.

Known systematic properties of the sample: Under representation of young people and over representation of german speaking people.

Deviations from ISSP questionnaire: None

Study Description: Taiwan

Study title: Taiwan Social Change Survey: the Fourth Survey of the Fourth Cycle
Fieldwork dates: 08/10/2003~for about one month
Principal investigators: Chang, Ying-hwa
 Institute of Sociology, Academia Sinica
Sample type: Three-stage Stratified PPS Sampling
 (1) PSU=township, (2) Li (administrative unit under township), (3) respondent
Fieldwork institute: Center for Survey Research, Academia Sinica
Fieldwork methods: Face-to-face interview
Sample size: 2016

Response rates:

4391	A - Total issued (total sample)
138	B - Ineligible (address vacant, wrong ages,...)
4253	C - (= A - B) Total eligible (in scope sample)
2016	D - Total ISSP questionnaires received
2237	E - (= C - D; = F + G + H) Total non-response
594	F - Refusals (refusing to take part)
56	G - Non-contact (never contacted)
1587	H - Other non-response

Language: Mandarin, Taiwanese, or Hakka
Weighted: no
Weighting procedure:
Known systematic properties of the sample: A non-response bias comes from the use of household registration data in which some household members in fact do not live in the household.
Deviations from ISSP questionnaire: Some variables are not included in the data

Study Description: Uruguay*Study title:* National Identity - (ISSP 2003 Module)*Fieldwork dates:* From July 12 to August 16, 2004*Principal investigators:* Zuleika Ferre, Giorgina Piani, Máximo Rossi from Department of Economics and Juan José Goyeneche, Guillermo Zoppolo from Institute of Statistics from University of Uruguay*Sample type:* The sampling frame used was the 1996 Population Census. The Universe population are adults (18 year-old or more) that reside in Urban areas.

The design is stratified multistage. Two major regions are represented: Montevideo Metropolitan Area (strata 1-7) and Urban population in the rest of the Country (5000 or more inhabitants cities, strata 11-13).

In strata 1 to 7, Census Zones (usually one block) are selected by a systematic proportional to size (pps) scheme (“size” being the number of people on each block), then four households are selected on each block, and one person per household is selected via the “next birthday” rule.

In strata 11 to 13, four cities are selected per stratum via systematic pps sampling. Size again being number of people residing on each city. Census Zones, households and persons are selected in the same way as in strata 1 to 7.

Sample allocation:

Table 1

Stratum	Population	Sample
1	224.396	96
2	367.513	156
3	428.118	184
4	286.499	120
5	78.576	32
6	191.474	80
7	21.368	12
11	349.935	144
12	325.190	144
13	317.427	140
Total	2.590.496	1.108

Fieldwork institute: Department of Economics – Faculty of Social Sciences, University of Uruguay

Fieldwork methods: Face to face interviews

Context of ISSP questionnaire: The National Identity 2003 module was carried out in conjunction with de Citizenship 2004 module.

The questionnaire was structured as follows: firstly, the Citizenship module, the National Identity module, and finally, demographic variables.

Sample size: 1108

Response rates:

CONCEPT	Total
A - Total issued (total sample)	1389
B - Ineligible (address vacant, wrong ages,...)	0
C - (= A - B) Total eligible (in scope sample)	1389
D – Total ISSP questionnaires received	1108
E - (= C - D; = F + G + H) Total non-response	281
F - Refusals (refusing to take part)	176
G - Non-contact (never contacted)	72
H - Other non-response (incomplete questionnaires)	33

Language: Spanish

Weighted: The data submitted are not weighted

Weighting procedure: The weight is computed as the inverse of the selection probability for each person. The steps concerning the household selection are done with pps sampling, so the household weights are equal to number of households on stratum divided by the number of households selected on each stratum. The household weight is then expanded by the person weight, which corresponds to the number of adults on the household. On some households the number of adults goes up to 10, as a conservative measure we reduced these weights considering a maximum number of 5 for the person weight. Since we estimated the number of household per stratum, we finally adjusted the weights in order to match the number of people per stratum that appear on the previous table 1.

Known systematic properties of the sample: None that we are aware.

Deviations from ISSP questionnaire: The questionnaire was translated as closely as possible from English to Spanish, maintaining the meaning and significance of each sentence and word.

Some general comments:

- In questions V58: we opened this question in v58_a and v58_b. The reason for that was: in Uruguay commonly family are formed with people from different countries (mainly from Spain and Italy)

- **DEMOGRAPHICS VARIABLES:**

- UNION: The code 2 was not included.
- INCOME and RINCOME: In these questions, incomes were measured in categories and we coded them.
- URBRURAL: It was not self assessment. Was coded by the field supervisor.

The value labels for UY_DEGR, INCOME, RINCOME, UY_PRTY, UY_REG AND UY_SIZE are:

Study Description: Venezuela*Study title:* General Social Survey - National Identity*Fieldwork dates:* 22-3-2004 to 08-04-2004*Principal investigators:* Roberto Briceño León

Sample type: The stratification variable used was the political and administrative division consisting of 23 states. But 2 states (Amazonas and Delta Amacuro with lesser population) were joined together, so that there was 22 instead of 23 strata.

The sampling frame was the list of censal segments used to carry out the XIII Venezuelan National Census. It included demographic and mapping information prepared by the National Institute of Statistics (Instituto Nacional de Estadística) for the 2001 census.

The sampling method was carried out in three stages. In the first stage we selected censal segments from each stratum with proportional probability to their number of dwellings

In the second stage were selected two "blocks" from each censal segment using a systematic geographical order selection technique with a random start. The selection of blocks was with probability proportional to the number of dwellings in each block.

Finally a person was selected according to a quota by sex and age. Five persons were selected from each block with one person selected from each household. The start in each block to get the first dwelling was random.

The quota was established using sex and age groups accordingly to the national distribution of people by sex and age revealed in the 2001 National Census

Fieldwork institute: Laboratorio de Ciencias Sociales, LACSO*Fieldwork methods:* Face to face personal interview*Sample size:* 1199*Response rates:*

1337	A - Total issued (total sample)
43	B - Ineligible (address vacant, wrong ages,...)
1294	C - (= A - B) Total eligible (in scope sample)
1199	D - Total ISSP questionnaires received
95	E - (= C - D; = F + G + H) Total non-response
54	F – Refusals (refusing to take part)
29	G - Non-contact (never contacted)
12	H - Other non-response

<i>Language:</i>	Spanish
<i>Weighted:</i>	Yes
<i>Weighting procedure:</i>	Post-stratification was carried out by standard of living groups (slg), based on similar previous studies. Final sample weights were adjusted by a factor obtained using the next equation: $Fe = \text{Expected \% slg "e"} / \text{observed \% slg "e"}$
<i>Known systematic properties of the sample:</i>	The isolated indigenous population living in the Amazon (Yanomami, Warao, etc) was excluded, but they represented less than 1% of total population. There were limitations reaching people from High Class areas.
<i>Deviations from ISSP questionnaire:</i>	None
<i>Publications:</i>	None

Explanations

<1> A variable (and reference) number have been assigned to each item in the study. In the present codebook which documents the archived data set, these numbers are identical. Should the data set be subsetted or rearranged the variable numbers might change to reflect the order of the new data set while the reference numbers would remain unchanged to provide a link to the archived data set.

<2> Indicates the abbreviated variable label used within OSIRIS or SPSS system files.

<3> "Missing Values" indicates the designation of the missing data codes.

<4> Indicates the full question text taken from the British questionnaire. Wherever possible the original sequence of questions has been retained, although some changes were necessary to integrate the different national questionnaires.

<5> Indicates commentaries and explanations added during the processing of the study. < within question or answer texts may indicate whether the questionnaire in a particular country is deviating from the general format.

<6> Indicates the code value for the single answer category.

<7> Indicates the textual definition of the codes. Abbreviations commonly used are DK (don't know), NA (no answer), Can't choose, Not applicable and Not available.

<8> Indicates percentage frequencies by country. This form is used whenever code categories have the same meaning for all countries. Column percentages are based only on "valid cases". Missing data values were excluded from percentages.

V1 ISSP Study Number

V2 Respondent ID Number

Respondent Number

This number uniquely identifies each respondent.

The first two digits are identical with the country code, the next five digits contain the original identification number.

V3 Country

Country:	(N)

V4 Most important group R identifies with

Missing Values: 98; 99

Q. 1. We are all part of different groups. Some are more important to us than others when we think of ourselves. In general, which in the following list is most important to you in describing who you are? and the second most important? and the third most important?¹

Q1a First most important, Q1b Second most important, Q1c Third most important.

1. Your current or previous occupation (or being a homemaker)
 2. Your race/ethnic background
 3. Your gender (that is, being a man/woman)
 4. Your age group (that is, Young, Middle, Age, Old)
 5. Your religion (or being agnostic or atheist)
 6. Your preferred political party, group, or movement.
 7. Your nationality
 8. Your family or marital status (that is , son/daughter, mother/father, grandfather/grandmother, husband/wife, widower/widow, nor married, or other similar).
 9. Your social class (that is upper, moddle, lower, working, or similar categories)
 10. The part of [COUNTRY] that you live in
 11. [ES]:None
98. Can't choose
99. Na, refused

V5 Second most important group R identifies with

Missing Values: 98; 99

Q1.- We are all part of different groups. Some are more important to us than others when we think of ourselves. In general, which in the following list is most important to you in describing who you are? Please tick one box in the first column. And which is the second most important? And the third most important?

Q1a First most important, **Q1b Second most important**, Q1c Third most important.

1. Your current or previous occupation (or being a homemaker)
 2. Your race/ethnic background
 3. Your gender (that is, being a man/woman)
 4. Your age group (that is, Young, Middle, Age, Old)
 5. Your religion (or being agnostic or atheist)
 6. Your preferred political party, group, or movement.
 7. Your nationality
 8. Your family or marital status (that is , son/daughter, mother/father, grandfather/grandmother, husband/wife, widower/widow, nor married, or other similar).
 9. Your social class (that is upper, moddle, lower, working, or similar categories)
 10. The part of [COUNTRY] that you live in
 11. [ES]:None
98. Can't choose
99. Na, refused, no second response

V6 Third most important group R identifies with

Missing Values: 98; 99

Q1.- We are all part of different groups. Some are more important to us than others when we think of ourselves. In general, which in the following list is most important to you in describing who you are? Please tick one box in the first column. And which is the second most important? And the third most important?

Q1a First most important, Q1b Second most important, **Q1c Third most important.**

1. Your current or previous occupation (or being a homemaker)
 2. Your race/ethnic background
 3. Your gender (that is, being a man/woman)
 4. Your age group (that is, Young, Middle, Age, Old)
 5. Your religion (or being agnostic or atheist)
 6. Your preferred political party, group, or movement.
 7. Your nationality
 8. Your family or marital status (that is , son/daughter, mother/father, grandfather/grandmother, husband/wife, widower/widow, nor married, or other similar).
 9. Your social class (that is upper, moddle, lower, working, or similar categories)
 10. The part of [COUNTRY] that you live in
 11. [ES]:None
98. Can't choose
99. Na, refused, no third response

V11 Important: to have been born in [Country]

Missing Values: 8; 9

Q3.- Some people say that the following things are important for being truly [NATIONALITY]¹. Others say they are not important. How important do you think each of the following is... (Please, tick one box on each line)

a. to have been born in [COUNTRY]

1. Very important.
2. Fairly important.
3. Not very important.
4. Not important at all.

8. Can't choose.
9. Na, refused.

Notes:

¹ Precode "truly [COUNTRY NATIONALITY]" E.g. "truly British", American "a true American".

V14 Important: To be able to speak [Country language]

Missing Values: 8; 9

Q3.- Some people say that the following things are important for being truly [NATIONALITY]¹. Others say they are not important. How important do you think each of the following is... (Please, tick one box on each line)

d. to be able to speak [COUNTRY LANGUAGE]²

1. Very important.
2. Fairly important.
3. Not very important.
4. Not important at all.

8. Can't choose.
9. Na, refused.

Notes:

¹ Precode "truly [COUNTRY NATIONALITY]" E.g. "truly British", American "a true American".

² [dominant language(s)] If two or more languages are recognized nationwide both are included in the question. However, if there is one national lingua franca (Spanish, Russian) just give this language.

V18 Important: To have [country nationality] ancestry

Missing Values: 0; 8; 9

Q3.- Some people say that the following things are important for being truly [NATIONALITY]¹. Others say they are not important. How important do you think each of the following is... (Please, tick one box on each line)

h. to have [COUNTRY NATIONALITY] ancestry²

1. Very important.
2. Fairly important.
3. Not very important.
4. Not important at all.

0. Not available (not asked)
8. Can't choose.
9. Na, refused.

Notes:

¹ Precode "truly [COUNTRY NATIONALITY]" E.g. "truly British", American "a true American".

² Question not asked in Bulgaria and Latvia

V37 For certain problems, like environment pollution, international bodies should have the right to enforce solutions

Missing Values: 0; 8; 9

Q6.- How much do you agree or disagree with the following statements? (Please, tick one box on each line)

b. For certain problems, like environment pollution, international bodies should have the right to enforce solutions ¹

1. Agree strongly.
2. Agree.
3. Neither agree nor disagree.
4. Disagree.
5. Disagree strongly.

0. Not available (not asked)
8. Can't choose.
9. Na, refused.

V46 A benefit of the Internet is that it makes information available to more and more people worldwide.

Missing Values: 8; 9

Q7.- How much do you agree or disagree with the following statements? (Please, tick one box on each line)

f. A benefit of the Internet is that it makes information available to more and more people worldwide.

1. Agree strongly.
2. Agree.
3. Neither agree nor disagree.
4. Disagree.
5. Disagree strongly.

8. Can't choose.
9. Na, refused.

V49 Help minorities to preserve traditions

Missing Values: 8; 9

Q9.- Some people say that it is better for a country if different racial and ethnic groups maintain their distinct customs and traditions. Others say that it is better if these groups adapt and blend into the larger society. Which of these views comes closer to your own?

1. It is better for society if groups maintain their distinct customs and traditions.
2. It is better if groups adapt and blend into the larger society.

8. Can't choose.
9. Na, refused.

V64 What language speak at home 1st mention

Missing Values: 00;998;999

Q17.- What languages do you speak most often at home? At home, I speak: [write down up to two choices]

1. Africa,Mandinka,Somalia,Sudan,Yoruba	49. German,Germany (CZ:Nemec)	97. Pacific,Polynesian,Chamorro Guam
2. Afrikaan	50. German+Danish	98. Pakistan,Panjab/Punjabi,Pashto
3. Aklanon,Romblon	51. Greek,Greece	99. Panggalatok Pangasinan,Pangasinense
4. Albanian	52. Hebrew/Ivrit	100. Philippines,Tagalog,Filippino
5. Alsacien, France	53. Hungarian,Hungary (CZ:Magyar)	101. Pidgin, PNG Pidgin
6. American Indian,Navajo,Ind.Dialect	54. Ibanag	102. Polish,Pole,Poland
7. American,American only,America,USA	55. Ifugao	103. Portuguese, Portugal
8. Antiqueño	56. Igorot	104. Provençal, France
9. Arab,Arabic,Muslim	57. Ilocano	105. Romani,Gipsy ,Tzyganes
10. Armenian,Transcaucasian	58. Ilonggo	106. Romanian/Rumanian
11. Asian,Asia,other Asian	59. French+English	107. Romblonon
12. Australian,Oceanian,Australia	60. Indian,Hindi,Urdu,Gujarati,Tamil	108. Russian,Russia,USSR&Rep.
13. Austrian,Austria	61. Indonesian,Malay/Malaysian	109. Samic,Lapp
14. Bangladeshi,Bengali,Bangladesh	62. Inuit, Eskimo	110. Samoan,Tokelauan
15. Basque/Vasco	63. Iranian,Persian/Farsi,Dari	111. Scotland,Scots Gaelic,Scottish
16. Belgian,Belgium	64. Iraq	112. Sepedi
17. Belorussian,Bialorussian	65. Irish/Irish Gaelic,Ireland	113. Serbia,Serbian,Serb, Yugoslavian
18. Bicolano/Bikol	66. Isindebele	114. Sesotho
19. Bilaan	67. Isixhosa	115. Setswana
20. Black/African/Caribbean,No-Spanish	68. Isizulu	116. Silesian
21. Bosnian, SLO:ethn.Muslim	69. Italian,Italy	117. Siswati
22. Breton, France	70. Itawis	118. Slovakia,Slovak
23. Bul-anon	71. Itneg	119. Slovenia,Slovenian,Slovene
24. Bulgarian	72. Japanese,Japan	120. Somalia
25. Cajun French	73. Jordan	121. Spanish,Castilian,Castellano
26. Catalan,Valencian,Balear/Mallorquin	74. Kapampangan'	122. Subanen
27. Coloured	75. Karay-a	123. Surigaonon
28. Cook Island Maori	76. Korean	124. Swedish (both citizen)
29. Corse, France	77. Kurdish,Assyrian,Lebanese	125. Switzerland,Rheto-roman
30. Creole,Surinam/Sranan,Metis,Chavacano	78. Latin-American, South America, Spanish Origin western countries	126. Tatar
31. Jewish/Yiddish	79. Latvian,Estonian,Lith.,Baltic	127. Thai,Khmer,Vietnamese,Cont.Southeast
32. Croatian	80. Lithuanian	128. Tongan,Niuean
33. Czech-Czechia,Czech Republic	81. Luxemborger, Luxemburg	130. Tshivenda/Lemba
34. Chinese-Cantonese,Hakka,Mandarin	82. Philippine other (Maguindanao, Kuyonin, Tangadanon, Zambaleño)	131. Turkey,Turkish
35. Danish,Denmark	83. Maori,NZ Maori	132. Ukraine,Ukrainian
36. Danish+English	84. Maranaw/Maranao	133. Visayan/Cebuano,Boholano,Leyteno
37. English + Persian	85. Masbateño	134. Waray
38. English + Tai	86. Metis	135. Welsh
39. English,England&Wales,UK,England	87. Montenegro	136. Whites (all)
40. Esperanto,Latin,Slavonik,Celtic	88. Moravian	137. Xitsonga
41. Estonia	89. Netherlands,Dutch,Flemish	138. Zamboangeño
42. Ethiopia	90. Nordic,Scandinavian other	980. Other African language
43. European,White/European,Europe	91. North Africans	981. Other,East European
44. Europeans Mediterranean	92. Norwegian,Norway	982. Other,Middle East
45. Finnish,Finland	93. Occitan, France	983. Other,Mixed origin
46. French,France	94. One non-Swedish,both non-Swedish	984. Other,Western European
47. Gallego	95. Oriental	990. No languages at all
48. Georgian	96. Ozamisnon	

0. Not available (Not asked)

998. Don't know.

999. No answer.

NOTES:

⁽¹⁾ Not asked in Austria, Bulgaria, Chile, Germany, Great Britain, Hungary, Norway, Portugal, Philippines, Slovenia, Sweden, Uruguay and Venezuela

V65 What language speak at home 2nd mention

Missing Values: 00;99

Q17.- What languages do you speak most often at home? At home, I speak: [write down up to two choices]

1. Africa,Mandinka,Somalia,Sudan,Yoruba	49. German,Germany (CZ:Nemec)	96. Ozamison
2. Afrikaan	50. German+Danish	97. Pacific,Polynesian,Chamorro Guam
3. Aklanon,Romblon	51. Greek,Greece	98. Pakistan,Panjab/Punjabi,Pashto
4. Albanian	52. Hebrew/Ivrit	99. Panggalatok Pangasinan,Pangasinense
5. Alsacien, France	53. Hungarian,Hungary (CZ:Magyar)	100. Philippines,Tagalog,Filippino
6. American Indian,Navajo,Ind.Dialect	54. Ibanag	101. Pidgin, PNG Pidgin
7. American,American only,America,USA	55. Ifugao	102. Polish,Pole,Poland
8. Antiqueño	56. Igorot	103. Portuguese, Portugal
9. Arab,Arabic,Muslim	57. Ilocano	104. Provençal, France
10. Armenian,Transcaucasian	58. Ilonggo	105. Romani,Gipsy ,Tzyganes
11. Asian,Asia,other Asian	59. French+English	106. Romanian/Rumanian
12. Australian,Oceanian,Australia	60. Indian,Hindi,Urdu,Gujarati,Tamil	107. Romblonon
13. Austrian,Austria	61. Indonesian,Malay/Malaysian	108. Russian,Russia,USSR&Rep.
14. Bangladeshi,Bengali,Bangladesh	62. Inuit, Eskimo	109. Samic,Lapp
15. Basque/Vasco	63. Iranian,Persian/Farsi,Dari	110. Samoan,Tokelauan
16. Belgian,Belgium	64. Iraq	111. Scotland,Scots Gaelic,Scottish
17. Belorussian,Biorussian	65. Irish/Irish Gaelic,Ireland	112. Sepedi
18. Bicolano/Bikol	66. Isindebele	113. Serbia,Serbian,Serb, Yugoslavian
19. Bilaan	67. Isixhosa	114. Sesotho
20. Black/African/Carribbean,No-Spanish	68. Isizulu	115. Setswana
21. Bosnian, SLO:ethn.Muslim	69. Italian,Italy	116. Silesian
22. Breton, France	70. Itawis	117. Siswati
23. Bul-anon	71. Itneg	118. Slovakia,Slovak
24. Bulgarian	72. Japanese,Japan	119. Slovenia,Slovenian,Slovene
25. Cajun French	73. Jordan	120. Somalia
26. Catalan,Valencian,Balear/Mallorquin	74. Kapampangan'	121. Spanish,Castilian,Castellano
27. Coloured	75. Karay-a	122. Subanen
28. Cook Island Maori	76. Korean	123. Surigaonon
29. Corse, France	77. Kurdish,Assyrian,Lebanese	124. Swedish (both citizen)
30. Creole,Surinam/Sranan,Metis,Chavacano	78. Latin-American, South America, Spanish Origin western countries	125. Switzerland,Rheto-roman
31. Jewish/Yiddish	79. Latvian,Estonian,Lith.,Baltic	126. Tatar
32. Croatian	80. Lithuanian	127. Thai,Khmer,Vietnamese,Cont.Southeast
33. Czech-Czechia,Czech Republic	81. Luxemborger, Luxemburg	128. Tongan, Niuean
34. Chinese-Cantonese,Hakka,Mandarin	82. Philippine other (Maguindanao, Kuyonin, Tangadanon, Zambaleño)	130. Tshivenda/Lemba
35. Danish,Denmark	83. Maori,NZ Maori	131. Turkey,Turkish
36. Danish+English	84. Maranaw/Maranao	132. Ukraine,Ukrainian
37. English + Persian	85. Masbateño	133. Visayan/Cebuano,Boholano,Leyteno
38. English + Tai	86. Metis	134. Waray
39. English,England&Wales,UK,England	87. Montenegro	135. Welsh
40. Esperanto,Latin,Slavonik,Celtic	88. Moravian	136. Whites (all)
41. Estonia	89. Netherlands,Dutch,Flemish	137. Xitsonga
42. Ethiopia	990. No languages at all	138. Zamboangeño
43. European,White/European,Europe	90. Nordic,Scandinavian other	980. Other African language
44. Europeans Mediterranean	91. North Africans	981. Other,East European
45. Finnish,Finland	92. Norwegian,Norway	982. Other,Middle East
46. French,France	93. Occitan, France	983. Other,Mixed origin
47. Gallego	94. One non-Swedish,both non-Swedish	984. Other,Western European
48. Georgian	95. Oriental	

0. Not available (Not asked)

998. Don't know.

999. No answer.

NOTES:

⁽¹⁾ Not asked in Australia, Austria, Bulgaria, Canada, Chile, Finland, Germany, Great Britain, Hungary, Israel, Japan, Latvia, Norway, Poland, Portugal, Philippines, Russia, South-Africa, Slovenia, Sweden, Taiwan, United States, Uruguay and Venezuela

V68 R: More regional or national identity

Missing Values: 0; 8; 9

Q19b.- Some people think of themselves first as [COUNTRY NATIONALITY]. Others may think of themselves first as [region] ¹. Which if any, of the following best describes how you see yourself? ²

1. Only [regional identity].
 2. More [regional identity] than [COUNTRY NATIONALITY].
 3. As [regional identity] as [COUNTRY NATIONALITY].
 4. More [COUNTRY NATIONALITY] than [regional identity].
 5. Only [COUNTRY NATIONALITY].
-
0. Not available (Not asked)
 8. Can't choose.
 9. Na, refused.

Notes

⁽¹⁾ "Region" should be replaced by the appropriate subnational category in each COUNTRY (e.g. "Scotland" in Britain; "Catalonia" in Spain). If it is a face-to-face interview, insert the name of the appropriate subnational unit where the interview is being conducted; if it is a self-completion questionnaire, all the relevant subnational units should be mentioned (e.g. "see themselves first as Scottish, English, or Welsh"; "see themselves as only Scottish, English, or Welsh").

⁽²⁾ Not asked in Australia, Austria, Bulgaria, Canada, Chile, Denmark, Finland, Germany, Great Britain, Hungary, Ireland, Israel, Japan, Latvia, Norway, Philippines, Portugal, Slovenia, South Africa, South Korea, Sweden, Taiwan, United States, Uruguay and Venezuela.

V70 Benefits from being member of [the European Union]

Missing Values: 0; 8; 9

Q21.- Generally speaking, would you say that [COUNTRY] benefits or does not benefit from being a member of [the European Union]? (Non-members "would benefit" or "would not benefit")^{1,2}

1. Greatly benefits.
 2. Largely benefits.
 3. Somewhat benefits.
 4. Only a little.
 5. Not at all benefit.
-
0. Not available (Not asked); not applicable, never heard
 8. Can't choose.
 9. Na, refused.

Notes:

⁽¹⁾ Not asked in Australia, Bulgaria, Chile, Denmark, Germany, Great Britain, Ireland, Israel, Japan, Latvia, New Zealand, Norway, Philippines, Portugal, Slovenia, South Africa, South Korea, Sweden, Taiwan, Venezuela.

⁽²⁾ Precode: take the appropriate association, as in Q20.

Scale for non-members of whatever association is used: Would benefit/Would not benefit/Don't know/Have never heard of [the European Union] Uruguay: refers to MERCOSUR

Canada, United States: refers to NAFTA

EDUCYRS: R's Education I: years in school

Missing Values: 00;98;99

Educyrs. Education I - years (of full time) schooling including university but not vocational training.

- 00. Not available.
- nn. Number of years
- 95. Still at school,N:+uni.
- 96. Still at college,uni.
- 97. No form school.
- 98. Don't know
- 99. No answer, refused

DEGREE: R's Education II: categories

Missing Values: 8;9

Degree. Education II - highest education level / degree.

1. Lowest formal qualification.
 2. Above lowest qualification.
 3. Higher secondary completed.
 4. Above higher secondary level.
 5. University degree completed.
 7. [CH]: Other education.
-
0. No formal qualification (GB,IRL: No secondary education).
 8. Don't know.
 9. No answer.

SPISCO88: SP: Occupation ILO,ISCO 1988 4-digit

Missing Values: 0;9997;9998;9999

SPISCO88. Spouse/partner occupation, using ISCO 1998 4-digit notation ^{1,2}

xxxx ISCO code

110. Armed Forces

1000. Legislators, Senior Officials and Managers

2000. Professionals

3000. Technicians and Associate Professionals

4000. Clerks

5000. Service Workers and Shop Market Sales workers

6000. Skilled Agricultural and Fishery workers

7000. Craft and Related Trades workers

8000. Plant and Machine Operators and Assemblers

9000. Elementary Occupations

9996. Not otherwise specified

0. NAP, NAV, Not asked; Never had a job; No spouse

9997. Refused.

9998. Dont know.

9999. NA.

Notes:

⁽¹⁾ Venezuela used a different notation. France used 3-digit ISCO. South-Africa used 1-digit ISCO.

⁽²⁾ Not asked in Japan

Table shows 1 digit ISCO distribution for simplicity

INCOME: Family income

Missing values 0;999997;999998;999999

INCOME. Family income in [Country] currency

1..999996	Income
0.	Not available; No income; Not asked
999997.	Refused
999998.	Don't know
999999.	No answer

Notes:

This variable is country specific, even if it is integrated in the same variable. Some countries have coded the income as mid points of intervals that were asked to respondents. Unless specified otherwise, values are monthly incomes. Each country provided values in their own currency. An approximate exchange rate to the Euro at the field time is given for conversion purposes only (no conversion is provided within data itself).

RINCOME: Respondent's earnings

RINCOME. Respondent earnings in [Country] currency

1..999996	R's Income
0.	Not available; No income; Not asked
999997.	Refused
999998.	Don't know
999999.	No answer

Notes:

This variable is country specific, even if it is integrated in the same variable. Some countries have coded the income as mid points of intervals that were asked to respondents. Unless specified otherwise, values are monthly incomes. Each country provided values in their own currency. An approximate exchange rate to the Euro at the field time is given for conversion purposes only (no conversion is provided within data itself).

PARTY_LR: R's scale of political ideology

Missing Values: 0;8;9

Party_LR. Party preference or vote intention, coded to left-right position ¹.

1. Far left.
2. Left,center left.
3. Center,liberal.
4. Right,conservative.
5. Far right.
6. Other.

0. Not applicable, not available; variable from which is derived not asked
7. No party.
8. Don't know, DK: Don't remember.
9. No answer, refused.

Notes:

⁽¹⁾ *Not asked in Chile, Israel, South Africa and Taiwan*

ATTEND: Religious services - how often

Missing Values: 00;97;98;99

Attend. Attendance of religious services.

- 01. Several times a week.
- 02. Once a week.
- 03. 2 or 3 times a month.
- 04. Once a month.
- 05. Sev times a year.
- 06. Once a year.
- 07. Less frequently.
- 08. Never.

- 00. NAP; No religion; Not asked
- 97. Refused.
- 98. DK, varies too much.
- 99. No answer.

TOPBOT: R:Top Bottom self-placement 10 point scale

Missing Values: 00;97;98;99

Topbot. Top Bottom self-placement of respondent in a 10 point scale ^{1,2}.

01. Lowest.

02.

03.

04.

05.

06.

07.

08.

09.

10. Highest.

0. Not applicable, Not available; Not asked

97. Refused.

98. DK, varies too much.

99. No answer.

NOTES:

⁽¹⁾ Not asked in Great Britain and South Africa

⁽²⁾ In Canada, the variable was derived from CLASS, with these categories:

1 The lower class

2 The working class

3 Upper working class/lower middle class

4 Middle class

5 Upper middle class

6 Upper class

International Occupation Codes: ILO/ISCO 1988

This Note refers to ISCO88 and SPISCO88 and contains the International Occupation Codes of 1988.

1, 2 and 3 digit ISCO codes are also included with trailing zeros to complete four digits. In this way, some countries providing 3-digit ISCO codes only could also be included. Country specific codes were recoded to the 3 digit category to which they belong or, if it didn't exist, to the 2 or 1 digit category (for example country specific German code 7243 was recoded to 7240).

- 7422 'Cabinetmakers and related workers'
- 7423 'Woodworking machine setters and setter-operators'
- 7424 'Basketry weavers, brush makers and related workers'
- 7430 'Textile, garment and related trades workers'
- 7431 'Fibre preparers'
- 7432 'Weavers, knitters and related workers'
- 7433 'Tailors, dressmakers and hatters'
- 7434 'Furriers and related workers'
- 7435 'Textile, leather and related pattern-makers and cutters'
- 7436 'Sewers, embroiderers and related workers'
- 7437 'Upholsterers and related workers'
- 7440 'Pelt, leather and shoemaking trades workers'
- 7441 'Pelt dressers, tanners and fellmongers'
- 7442 'Shoe-makers and related workers'

Plant and machine operators and assemblers

- 8000 'Plant and machine operators and assemblers'
- 8100 'Stationary plant and related operators'
- 8110 'Mining and mineral-processing-plant operators'
- 8111 'Mining plant operators'
- 8112 'Mineral-ore and stone-processing-plant operators'
- 8113 'Well drillers and borers and related workers'
- 8120 'Metal-processing plant operators'
- 8121 'Ore and metal furnace operators'
- 8122 'Metal melters, casters and rolling-mill operators'
- 8123 'Metal heat-treating-plant operators'
- 8124 'Metal drawers and extruders'
- 8130 'Glass, ceramics and related plant operators'
- 8131 'Glass and ceramics kiln and related machine operators'
- 8139 'Glass, ceramics and related plant operators not elsewhere classified'
- 8140 'Wood-processing- and papermaking-plant operators'
- 8141 'Wood-processing-plant operators'
- 8142 'Paper-pulp plant operators'
- 8143 'Papermaking-plant operators'
- 8150 'Chemical-processing-plant operators'
- 8151 'Crushing-, grinding- and chemical-mixing-machinery operators'
- 8152 'Chemical-heat-treating-plant operators'
- 8153 'Chemical-filtering- and separating-equipment operators'
- 8154 'Chemical-still and reactor operators (except petroleum and natural gas)'
- 8155 'Petroleum- and natural-gas-refining-plant operators'

8159 'Chemical-processing-plant operators not elsewhere classified'
8160 'Power-production and related plant operators'
8161 'Power-production plant operators'
8162 'Steam-engine and boiler operators'
8163 'Incinerator, water-treatment and related plant operators'
8170 'Industrial robot operators'
8200 'Machine operators and assemblers'
8210 'Metal- and mineral-products machine operators'
8211 'Machine-tool operators'
8212 'Cement and other mineral products machine operators'
8220 'Chemical-products machine operators'
8221 'Pharmaceutical-and toiletry-products machine operators'
8222 'Ammunition- and explosive-products machine operators'
8223 'Metal finishing-, plating- and coating-machine operators'
8224 'Photographic-products machine operators'
8229 'Chemical-products machine operators not elsewhere classified'
8230 'Rubber- and plastic-products machine operators'
8231 'Rubber-products machine operators'
8232 'Plastic-products machine operators'
8240 'Wood-products machine operators'
8250 'Printing-, binding- and paper-products machine operators'
8251 'Printing-machine operators'
8252 'Book-binding-machine operators'
8253 'Paper-products machine operators'
8260 'Textile-, fur- and leather-products machine operators'
8261 'Fibre-preparing-, spinning- and winding-machine operators'
8262 'Weaving- and knitting-machine operators'
8263 'Sewing-machine operators'
8264 'Bleaching-, dyeing- and cleaning-machine operators'
8265 'Fur- and leather-preparing-machine operators'
8266 'Shoemaking- and related machine operators'
8269 'Textile-, fur- and leather-products machine operators not elsewhere classified'
8270 'Food and related products machine operators'
8271 'Meat- and fish-processing-machine operators'
8272 'Dairy-products machine operators'
8273 'Grain- and spice-milling-machine operators'
8274 'Baked-goods, cereal- and chocolate-products machine operators'
8275 'Fruit-, vegetable- and nut-processing-machine operators'
8276 'Sugar production machine operators'
8277 'Tea-, coffee- and cocoa-processing-machine operators'
8278 'Brewers, wine and other beverage machine operators'
8279 'Tobacco production machine operators'
8280 'Assemblers'
8281 'Mechanical-machinery assemblers'
8282 'Electrical-equipment assemblers'
8283 'Electronic-equipment assemblers'
8284 'Metal-, rubber- and plastic-products assemblers'
8285 'Wood and related products assemblers'

- 8286 'Paperboard, textile and related products assemblers'
- 8287 'Composite products assemblers'
- 8290 'Other machine operators not elsewhere classified'
- 8300 'Drivers and mobile plant operators'
- 8310 'Locomotive engine drivers and related workers'
- 8311 'Locomotive engine drivers'
- 8312 'Railway brakemen, signallers and shunters'
- 8320 'Motor vehicle drivers'
- 8321 'Motorcycle drivers'
- 8322 'Car, taxi and van drivers'
- 8323 'Bus and tram drivers'
- 8324 'Heavy truck and lorry drivers'
- 8330 'Agricultural and other mobile plant operators'
- 8331 'Motorised farm and forestry plant operators'
- 8332 'Earth-moving and related plant operators'
- 8333 'Crane, hoist and related plant operators'
- 8334 'Lifting-truck operators'
- 8340 'Ships' deck crews and related workers'

Elementary occupations

- 9000 'Elementary occupations'
- 9100 'Sales and services elementary occupations'
- 9110 'Street vendors and related workers'
- 9111 'Street vendors'

- 9320 'Manufacturing labourers'
- 9330 'Transport labourers and freight handlers'

- 9996 'Not classified;inadequately described'
- 9997 'Refused'
- 9998 'Dont know'
- 9999 'Na'
- 0 'NAP,NAV, No spouse, never had a job'.

Variable List

V1	ISSP Study Number.....	1
V2	Respondent ID Number.....	1
V3	Country.....	2
V4	Most important group R identifies with.....	3
V5	Second most important group R identifies with.....	5
V6	Third most important group R identifies with.....	7
V7	How close do you feel to: Your town - city	9
V8	How close do you feel to: Your [country]	11
V9	How close do you feel to: [country]	13
V10	How close do you feel to: continent	15
V11	Important: to have been born in [Country].....	17
V12	Important: To have [Country nationality] citizenship.....	19
V13	Important: To have lived in [Country] for most of one's life.....	21
V14	Important: To be able to speak [Country language]	23
V15	Important: To be a [religion].....	25
V16	Important: To respect [Country nationality] political institutions and laws	27
V17	Important: To feel [Country nationality]	29
V18	Important: To have [country nationality] ancestry.....	31
V19	I would rather be a citizen of [Country] than of any other country in the world.....	33
V20	There are some things about [Country] today that make me feel ashamed of [Country]	35
V21	The world would be a better place if people from other countries were more like the [Country nationality]	37
V22	Generally speaking, [Country] is a better country than most other countries.....	39
V23	People should support their country even if the country is in the wrong	41
V25	I am often less proud of [Country] than I would like to be.....	45
V26	How proud: The way democracy works	47
V27	How proud: Its political influence in the world	49
V28	How proud: [Country's] economic achievements	51
V29	How proud: Its social security system.....	53
V30	How proud: Its scientific and technological achievements	55
V31	How proud: Its achievements in sports.....	57
V32	How proud: Its achievements in the arts and literature.....	59
V33	How proud: [Country's] armed forces.....	61
V34	How proud: Its history.....	63
V35	How proud: Its fair and equal treatment of all groups in society	65
V36	[Country] should limit the import of foreign products in order to protect its national economy.....	67
V37	For certain problems, like environment pollution, international bodies should have the right to enforce solutions.....	69
V38	[Country] should follow its own interests, even if this leads to conflicts with other nations.....	71
V39	Foreigners should not be allowed to buy land in [Country]	73
V40	[Country's] television should give preference to [Country] films and programmes.....	75
V41	Large international companies are doing more and more damage to local businesses in [Country].	77
V42	Free trade leads to better products becoming available in [Country].....	79
V43	In general, [Country] should follow the decisions of international organizations to which it belongs, even if the government does not agree with them	81
V44	International organizations are taking away too much power from the [Country nationality] government	83
V45	Increased exposure to foreign films, music, and books is damaging our national and local cultures	85
V46	A benefit of the Internet is that it makes information available to more and more people worldwide.	87
V47	It is impossible for people who do not share [Country's] customs and traditions to become fully [Country's nationality]	89
V48	Ethnic minorities should be given government assistance to preserve their customs and traditions.....	91
V49	Help minorities to preserve traditions.....	93
V50	Immigrants increase crime rates	95
V51	Immigrants are generally good for [Country's] economy	97
V52	Immigrants take jobs away from people who were born in [Country]	99
V53	Immigrants improve [Country nationality] society by bringing in new ideas and cultures	101
V54	Government spends too much money assisting immigrants.	103

V55	Number of immigrants coming to country	105
V56	Are you a citizen of [Country]	107
V57	Parents citizen of [country] at birth.....	109
V58	Racial-ethnic group of R	111
V59	Children born in [Country] of parents who are not citizens should have the right to become [Country Nationality] citizens.	122
V60	Children born abroad should have the right to become [Country Nationality] citizens if at least one of their parents is a [Country Nationality] citizen.	124
V61	Legal immigrants to [Country] who are not citizens should have the same rights as [Country Nationality] citizens.	126
V62	[Country] should take stronger measures to exclude illegal immigrants?	128
V63	How proud are you being country national	130
V64	What language speak at home 1st mention	132
V65	What language speak at home 2nd mention.....	140
V66	One nation - Separate nation	147
V67	How close do you feel to your ethnic group	149
V68	R: More regional or national identity	151
V69	Heard-read about [the European Union]	153
V70	Benefits from being member of [the European Union]	155
V70b	Would benefit from being member of [the European Union]	157
V71	[Country] should follow decisions of EU.....	159
V72	EU should have more power than national government.....	161
V73	Vote if referendum to become new member.....	163
V74	EU members: Referendum to remain member	165
SEX	R: Sex	167
AGE	R's age.....	169
MARITAL	R's marital status	170
COHAB	R: Steady life-partner	172
EDUCYRS	R's Education I: years in school.....	174
DEGREE	R's Education II: categories	180
XX_DEGR	Country Specific Education Degree.....	182
WRKST	R's current employment status.....	193
SPWRKST	R's Spouse-Partner Current employment status.....	195
WRKHRS	R's hours worked weekly.....	197
ISCO88	R: Occupation ILO,ISCO 1988 4-digit.....	198
SPISCO88	SP: Occupation ILO,ISCO 1988 4-digit	200
WRKTYPE	R: Working for private,public sector, selfemployed.....	202
SPWRKTYP	Rs Spouse-Partner working for private,public sector, selfemployed.....	204
NEMPLOY	Self-employment II - how many employees.....	206
WRKSUP	R Supervises	207
UNION	R's syndical affiliation.....	209
HOMPOP	R's size of household.....	211
INCOME	Family income.....	214
RINCOME	Respondent's earnings	222
HHCYCLE	Household composition	230
PARTY_LR	R's scale of political ideology	233
XX_PRTY	Country Specific Vote Intention	235
VOTE_LE	R: Vote last election: yes, no	247
RELIG	Religious denomination	249
RELIGGRP	R: Religious main groups (derived)	257
ATTEND	Religious services - how often	259
TOPBOT	R: Top Bottom self-placement 10 point scale.....	261
XX_REG	Country specific region.....	263
XX_SIZE	Country specific town size	276
URBRURAL	Place of residence: urban-rural.....	285
ETHNIC	R's Ethnicity or nationality (Country specific).....	287
MODE	Administrative mode of data-collection	294
