

I currently live in a dorm building with many other people, making my energy consumption relatively low. I rarely have to travel by means other than walking or public transport.

CARBON FOOTPRINT

Swetha Pallerla - CPSG 101 Carbon Footprint Infographic

If I were in my 30's, I would share a detached home with one other person. Additionally, I would likely drive my own car every day. These factors would drastically increase my carbon footprint.
